Cover	Nuts, bur, and leaves of the Chinese chestnut (<i>Castanea mollissima</i> Bl.), introduced to this country from the Orient shortly after the turn of the century. This species is resistant to chestnut blight, the fungus disease that killed the American chestnut. Widespread planting of this species, both in orchards and as a yard tree, is bringing back the chestnut to the American scene (× 1.5). [J. W. McKay and F. H. Berry]
