

Editorial	The Other Fellows' Ball Park	1163
Articles	New Frontiers of Astronomical Technology: <i>A. B. Meinel</i>	1165
	Technological developments challenge the astronomer, both from the ground and in space.	
	Where Does Instrumentation Enter into Medicine?: <i>D. A. Holaday</i>	1172
	Modern technology can help medicine meet growing demands through instrumentation and automation.	
	Fuel Cells: <i>E. Yeager</i>	1178
	They produce more electricity per pound of fuel than any other nonnuclear method of power production.	
	The Cambridge Electron Accelerator: <i>M. S. Livingston</i> and <i>W. A. Shurcliff</i>	1186
	This 6-billion-volt machine will be the world's highest energy electron synchrotron.	
	Defocusing Images To Increase Resolution: <i>H. Osterberg</i> and <i>L. W. Smith</i>	1193
	Resolution of two luminous particles is improved by defocusing the microscope or telescope.	
	Radio Telemetry from within the Body: <i>R. S. Mackay</i>	1196
	Inside information is revealed by tiny transmitters that can be swallowed or implanted in man or animal.	
	Emission Spectrochemistry in Nutrition Research: <i>C. L. Grant</i>	1207
	The potential utility of spectrochemistry in mineral nutrition research is not yet fully exploited.	
	New Method for Heart Studies: <i>N. J. Holter</i>	1214
	Continuous electrocardiography of active subjects over long periods is now practical.	
	Mass Spectrographic Analysis of Solids: <i>N. B. Hannay</i>	1220
	High sensitivity for bulk and surface impurities is provided by a new analytical method.	
Science and the News	The Consortium Proposal: Private Industry Offers a Plan for Developing Satellite Communications; Food for Peace; Mental Retardation	1226
Book Reviews	Hiroshima Revisited: <i>A. H. Compton</i>	1231
	Governments seek agreements to control the atom, but historians still disagree on its first military use.	
	K. G. Zimmer's <i>Studies on Quantitative Radiation Biology</i> , reviewed by <i>A. Hollaender</i> ; other reviews	1233
Departments	Forthcoming Events	1236
	New Products	1243
Cover	Globular star cluster M3 in yellow light, taken at Kitt Peak 19 March 1961 with a GL-7629 image orthicon. Exposure time, 8.5 seconds. See page 1165.
