MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

No doubt the officers of the Carnegie Institution fully realize the responsibility resting upon them and will refrain from making any considerable appropriations from the funds placed at their disposal until a well-defined policy, having the approval of the leading men in various departments of scientific research, has been adopted. I take it for granted that the officers and trustees are fully impressed with the importance of using the generous endowment placed in their hands in the most economical manner possible, having in view the objects to be attained—that is, they will aim to accomplish the greatest possible results with the means at their disposal. This will require very careful consideration and very exact knowledge of what is being done by other institutions and endowments for scientific research both in this country and in Europe. To go over ground that has already been well plowed or to undertake investigations for which there is already adequate provision would be a waste of money and of energy. The Carnegie Institution should not come into competition with any existing, well-directed agency for research work, but should be ready to lend a helping hand wherever it is needed for the prosecution of work already commenced or projected by competent investigators; otherwise it will, to a
