

## AUTOMATIC ANIMAL WATERING...

can save you time, money, and a lot of grief. With a Hardco Automatic Watering System, lab animals always have a supply of fresh, filtered water. There are no bottles to refill, wash or replace. Personnel are free to do other things.

Heart of the Hardco System is a leak-proof dispenser that can be easily activated by a small animal. A dispenser is installed in each cage and is connected to the water source by a network of special plastic piping.

Hardco designs and installs systems for all species of lab animals... for both planned and existing facilities. Our catalog goes into the details. Write for it today.

## RESEARCH TOXICOLOGISTS

STANFORD RESEARCH INSTITUTE has excellent opportunities for experienced Toxicologists to join our Life Sciences Research Division. One position requires a Ph.D., and the second a B.S. or M.S., in toxicology, biochemistry, pharmacology or physiology. Applicants should have a strong background in biochemical toxicology and competence in physiology and pharmacology.

Principal areas of research involve investigation of agricultural chemicals, drugs, household chemicals and environmental contaminants. There are opportunities to undertake basic research problems as well as to direct and conduct applied projects. Much of the work allows opportunities for publication.

The Institute is located in an academic environment near Stanford University on the San Francisco Peninsula. If you are interested in working in an atmosphere that encourages innovation and offers personal advancement and recognition, liberal benefits and competitive salary, please send your resume to:
