COVER

Proposed U.S. supersonic transport (SST, Boeing 2707-300). Research in stratospheric meteorology has provided important information for future operational support of this and other supersonic transports. See page 16. [Gary Laurish Photography, Washington, D.C.; model courtesy of Boeing Co.]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
