## COVER

Pre-Columbian ridged fields extending into Lake Titicaca near Requeña, northeast of Juliaca, Peru. Most of the field remnants are 20 to 25 meters wide and 1 to 2 meters high. Similar aboriginal drainage systems have been found in widespread parts of the Americas. See page 647. [Instituto Geografico Militar, Lima, Peru]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
