

the world" to provide a context for the series. Next, the sources of human destructiveness ranging from the evolutionary basis of human behavior to the technological environment are considered. The following sessions will focus on the emerging international system—the practical needs of international organizations, alternative models

of world order and the processes of peaceful change. The final sessions will explore the requirements for coping with actual conflict situations—specifically Vietnam and the inner city.

The symposium has been arranged with the cooperation of the Consortium on Peace Research, Education and Development, and support from the Insti-

tute for International Order. Participants will be drawn from different disciplines, from abroad as well as from the United States and from among policy makers as well as scientists.

VINCENT P. ROCK
*Division of Behavioral Sciences,
 National Academy of Sciences,
 Washington, D.C.*

Topics and Speakers

27 December (morning)

Science and the International System

Chairman: Bruce M. Russett (Professor of Political Science, Yale University).

The Economics of Peaceful Change. Speaker to be announced.

Peace Research: Present Scope and Future Significance, Karl W. Deutsch (Stanfield Professor of International Peace, Harvard University).

Past and Future, or Through a Glass Darkly, William H. McNeill (Professor of History, University of Chicago).

27 December (afternoon)

Peace through Change: The Risk and the Promise for Man's Future

Speaker: Senator Hubert H. Humphrey.

Participants: Elise Boulding (Founder, Consortium on Peace Research, Education and Development, University of Colorado), Kenneth Clark (City University of New York), Karl W. Deutsch (Stanfield Professor of International Peace, Harvard University), George Rathjens (Professor of Political Science, Massachusetts Institute of Technology).

28 December (morning)

Biological Basis of Destructive Behavior

Chairman: Lorenz K. Y. Ng. *Evolutionary Considerations,* Louis S. B. Leakey (Center for Prehistory and Palaeontology, National Museum, Nairobi, Kenya).

Development of Aggression in Primates, Allyn C. Deets (Laboratory of Clinical Science, University of Pittsburgh), Margaret K. and Harry F. Harlow (University of Wisconsin).

Crowding and Maladaptation: Behavioral and Neurochemical Observations, Halsey M. Marsden and John B. Calhoun (Laboratory of Brain Evolution and Behavior, National Institute of Mental Health), and Lorenz K. Y. Ng (Laboratory of Clinical Science, National Institute of Mental Health).

Human Violence: Some Causes and Implications, Peter A. Corning (Institute for Behavioral Genetics, University of Colorado).

28 December (afternoon)

Environmental Sources of Human Destructiveness

Chairman: Robert C. North (Professor of Political Science, Stanford University).

Statist Imperatives in an Era of System Overload, Richard A. Falk (Albert G. Milbank Professor of International Law and Practice, Woodrow Wilson School of Public and International Affairs, Princeton University).

World Energy Resources: Distribution, Utilization and Long-Term Availability, Robert H. Williams (Assistant Professor of Physics, Research Associate for the Institute for Environmental Quality, University of Michigan).

International Implications of Technological Development and Population Growth, Dennis L. Meadows (Assistant Professor in Management, Massachusetts Institute of Technology), and Nazli Choucri (Assistant Professor of Political Science, M.I.T.).

29 December (morning)

Toward a World Community—International Organizations

Chairman: Chadwick F. Alger (Mershon Professor of Political Science and Public Policy, Ohio State University).

Social Science Knowledge Needs of International Scientific Organizations, Zdenek J. Slouda (Columbia University).

Computer Visualization of Evolving Organizational Structures for Peace, Anthony Judge (Union of International Associations, Brussels).

Multinational Business Enterprises: A Global Perspective, George Modelski (Professor of Political Science, University of Washington).

Discussants: Edward Miles (University of Denver), Robert Cox (Director, International Labor Organization [on leave] and Visiting Professor, University of Toronto).

29 December (afternoon)

Toward a World Community—World Order Models

Chairman: Saul H. Mendlovitz

(Professor of Law, University of Rutgers Law School and Director, World Order Models Project, World Law Fund, New York City).

Participants: Johan Galtung (Director, International Peace Research Institute, Oslo, Norway), Ali A. Mazrui (Chairman, Department of Political Science, Makerere University, Kampala, Uganda), Richard A. Falk (Albert G. Milbank Professor of International Law and Practice, Woodrow Wilson School of Public and International Affairs, Princeton University).

Discussant: George B. Kistiakowsky (Professor of Chemistry, Harvard University).

30 December (morning)

Conflict Situations: Vietnam—Knowledge Gaps

Chairman: Morton H. Halperin (Foreign Policy Studies, Brookings Institution).

American Interests and Domestic Politics, Leslie Gleb (Foreign Policy Studies, Brookings Institution).

Knowledge about Vietnam, Frankie Fitzgerald (Southeast Asian Analyst).

30 December (afternoon)

Urban Conflict as a Teaching Tool

Chairman: Paul E. Wehr.

Conflict Education: A New Direction in Higher Learning, Paul E. Wehr (Director, Center for Nonviolent Conflict Resolution and Lecturer in Sociology, Haverford College) and Robert DeHaan (Director, Great Lakes College Association Urban Semester Program, Hope College, Holland, Michigan).

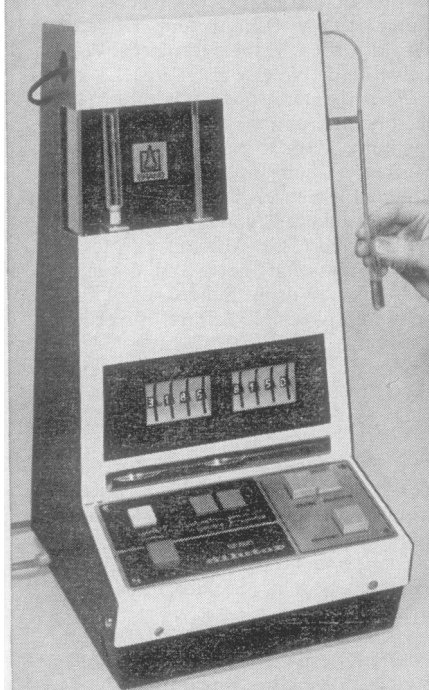

Youth Responds to Crisis: Curacao, A. Paul Hare and Fred Ovsiew (Department of Sociology, Haverford College).

Training the Student Activator, Rudolph Tolbert (Director, Northwest Tenants Organization, Philadelphia), Brenda Jefferson (New York University Law School), and Carl Tannenbaum (Suburban Intern, Center for Nonviolent Conflict Resolution, Haverford College).

All sessions are to be held at the Sheraton Hotel.

The most accurate dilutor made.

Naturally, its also the most expensive.

What makes the Brinkmann Automatic Dilutor so expensive (\$2,700) is what makes it so phenomenally accurate: a digital electronic volume setting system, and two precision cylinder and piston assemblies (with only two moving parts in each).

Sample and reagent are mixed additively, automatically. Liquids contact only glass and PTFE components. Simple, push-button operation. Operating range: Reagent, 1.0 to 5,000 μ l in steps of 1.0 μ l; Sample, 0.1 to 500 μ l in steps of 0.1 μ l.

Before you splurge, get our literature. Just write: Brinkmann Instruments, Cantiague Rd., Westbury, N.Y. 11590. In Canada, write: Brinkmann Instruments (Canada) Ltd., 50 Galaxy Blvd., Rexdale (Toronto), Ont.
