Vol. 175, No. 4028

LETTERS

EDITORIAL
Federal Statistics .......................................................... 1315

ARTICLES
Prehispanic Adaptation in the Ixtapalapa Region, Mexico: R. E. Blanton .................... 1317
Migration Strategies of Insects: H. Dingle ........................................... 1327

NEWS AND COMMENT
NASA: Caught between Congress and Apartheid ........................................ 1341
White House Presents Vapid Technology Plan ........................................ 1343
Blood Banking: Money Is at Root of System’s Evils .................................. 1344

RESEARCH NEWS
Cell Membranes: A New Look at How They Work ..................................... 1348

BOOK REVIEWS
Elementary Particles, reviewed by G. Feinberg; Science, Scientists, and Public Policy, J. M. Logsdon; Human Cytogenetics, A. D. Bloom; The Immunobiology of Transplantation, M. Edidin; Cambrian of the New World, L. L. Sloss; The Organic Chemistry of Palladium: G. M. Whitesides; Books Received .................. 1351

REPORTS
Rotational Inertia of Continents: A Proposed Link between Polar Wandering and Plate Tectonics: M. F. Kane .............................................. 1355
System Approach for Reducing Car Pollution: R. Shinnar .......................... 1357
Jupiter: Observation of Deuterated Methane in the Atmosphere: R. Beer et al. .... 1360

SCIENCE is published weekly, except with an extra issue on the third Tuesday in November, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Second-class postage paid at Washington, D.C. Copyright © 1972 by the American Association for the Advancement of Science. Annual subscription $20; foreign postage: Americas $3; overseas $5; air freight to Europe, North Africa, Near East $10; single copies $1 (back issues, $2) except Guide to Scientific Instruments which is $4. School year subscription: 9 months, $15; 10 months, $16.75. Provide 4 weeks notice for change of address, giving new and old address and zip codes. Send a recent address label. SCIENCE is indexed in the Reader’s Guide to Periodical Literature.
Action Spectra for Photoperiodic Response in a Diapausing Mosquito: W. E. Bradshaw .................................................. 1361
Digitonin Effects on Photoreceptor Adenylate Cyclase: M. W. Bitensky, R. F. Gorman, W. H. Miller .......................................................... 1363
1-Methyladenine Biosynthesis in Starfish Ovary: Action of Gonad-Stimulating Hormone in Methylation: H. Shirai, H. Kanatani, S. Taguchi ...... 1366
Galactose Utilization in Galactosemia: J. C. Petricciani et al. .................. 1368
Oxygen Affinity in Red Cells: Changes Induced in vivo by Propanolol: F. A. Oski et al. ................................................................. 1372
Acetylcholine: Possible Neuromuscular Transmitter in Crustacea: K. J. Futamachi ... 1373
Cilia: Activation Coupled to Mechanical Stimulation by Calcium Influx: A. Murakami and R. Eckert .................................................. 1375
Thyroxine-Binding Globulin: Characterization of the Binding Site with a Fluorescent Dye as a Probe: A. M. Green et al. .................. 1378
Biogenic Amine Metabolites in Cerebrospinal Fluid of Depressed and Manic Patients: J. Mendels et al. .................................................. 1380
Proprioceptive Illusions Induced by Muscle Vibration: Contribution by Muscle Spindles to Perception?: G. M. Goodwin, D. I. McCloskey, P. B. C. Matthews ... 1382
Sound Production in Scytopitae: Chemostimulus of Sonic Signal by the Douglas-Fir Beetle: J. A. Rudinsky and R. R. Michael ........................ 1386
Altruistic Behavior in a Sphecid Wasp: Support for Kin-Selection Theory: W. G. Eberhard .................................................. 1390

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
