Modeling of Photochemical Smog: M. C. Dodge ............................................. 1259

COVER
Comparison of the skeletons of the lion (Felis leo) and bobcat (Lynx rufus) to the same scale. Although
the skeletons of the two animals are grossly similar, each bone of the bobcat (foreground) is rela-
tively more slender than that of the lion. See page 1201. [T. A. McMahon, Harvard University]
Science 179 (4079), 1181-1260.
