

Science for Listening

CANCER — the latest in the AAAS audiotape cassette album series.

WHY? This most baffling question is asked every day by over 1000 Americans. Cancer, a disease of fear, anxieties, and of the unknown. A disease that strikes for no apparent reason. Is there an answer? Is there hope? On four hour-long cassettes, science journalists interview 19 leading physicians and cancer researchers. Listen to what the experts in medical science know and the potential that research holds. The newest audiotape album from AAAS is accompanied by a 40-page booklet condensing much of the information contained in the series of tape-recorded narratives. Order the entire package or the booklet alone.

List price: \$49.95 Booklet alone: \$2.50
(special PREPAID member price: \$44.95. Booklet alone: \$2.00)

AND NOW . . . for a limited time only, the Association is able to offer its readers the following proven favorites at a special low price to enable you to expand your collection. Which ones do you need for classroom discussions, personal study, or library reference? Look over the list and note how prices have been reduced. Increase your knowledge while we decrease our prices. Order **NOW** while the supply lasts.

Energy: A Dialogue

A six-tape album plus booklet which focuses on three major themes: the energy crisis, what it is and how it got that way; the technological options, what they are and how much they will cost; and the interrelationship of energy with environment and politics and how it affects our lifestyles and family budgets.

List price: ~~\$49.95~~ **\$35.00**

Origins

What is man's deepest mystery? How did life begin? What is the genesis, life, and death of stars? How was the universe created? Four of the world's leading scientists probe these and other questions in *Origins*, an audiotape album with four 50-minute cassettes and accompanying booklet. For the inquisitive mind, for the science student, for anyone who wants to learn more about his own origin or that of his world.

List price: ~~\$39.95~~ **\$30.00**

The Physical World

Designed for the graduate physicist and other scientists, *The Physical World* contains six lectures selected from presentations at the 14th General Assembly of the International Union of Pure and Applied Physics. The lectures explore such topics as the theory and techniques of scattering methods, the evolution of solid state theory, the various types of nuclear phenomena, as well as questions about how

physicists and the lay public can share "the thrill of discovery and the satisfaction of understanding." The accompanying booklet contains reproductions of many of the slides used in the original presentations.

List price: ~~\$69.95~~ **\$55.00**

Speaking of Science

To help you understand the world through science, AAAS created this three-volume series of audiotapes. Thirty-six conversations between well-known scientists and science writers explore pertinent scientific issues, discoveries and topics of research. Designed for listening both in the home and in the classroom, each volume contains 12 scintillating half-hour conversations certain to spark hours of interesting and informative discussions. The volumes may be purchased separately or in a set. Quantities are limited.

A partial listing of conversations

Volume I: Health Care and Delivery; Technology Today; The Finite Earth.

List price: ~~\$39.95~~ **\$35.00**

Volume II: The Dilemma of Prisons; New Dimensions in Human Genetics; Energy Rationing.

List price: ~~\$39.95~~ **\$35.00**

Volume III: The Science of Violence; Population Policy and Human Development; The Earth's Fire.

List price: ~~\$39.95~~ **\$35.00**

Three-Volume Set (Vols. I-III)

List price: ~~\$99.95~~ **\$85.00**

Reviews of Science

Philip H. Abelson
Series Editor

AAAS brings you outstanding publications on the critical issues of today . . . a series of Compendium Volumes that includes authoritative articles originally published in SCIENCE — articles you would have clipped for future reference if you knew then what the critical issues of today would be — articles you will want to assign your students for background reading, or use to supplement your own professional library. . . . Each compendium is available in your choice of casebound or paperbound edition. Order one—or all of them—today!

ENERGY: Use, Conservation, and Supply

A collection of enduring and readable articles on problems in the use of energy for food production and distribution; the potential of oil, coal, gas, and uranium for meeting present and future energy needs; long-term optional energy sources such as geothermal and solar energy and the possible use of methanol as a supplement to or substitute for dwindling gasoline supplies. This compendium provides a wealth of information for individuals as well as those in industry.

POPULATION: Dynamics, Ethics, and Policy

The ethics of choice . . . the interrelationship of population size and economic development . . . the consequences of population growth—such are the issues debated in this collection of outstanding articles, research reports, and policy debates. The papers provide a close look at population research as conducted and reported by American scientists, as well as a glimpse at the continuing debate between those who advocate different methods of contraception and population control.

FOOD: Politics, Economics, Nutrition, and Research

This report is essential reading for everyone concerned with the serious problems we face in meeting the world's food needs. It contains thirty-one articles on the perspectives and politics of the world food situation, the nutritional aspects of world food problems, and the impact of agricultural and biological research on food production and availability. Together these articles provide a provocative reassessment of the worldwide food crisis and a realistic look at our options for the future.

MATERIALS: Renewable and Non-renewable Resources

An important exploration of the new set of realities affecting the flow of raw materials. This compendium probes the implications of national policy, energy constraints, environmental considerations on materials production and use, the perspectives in needs and supplies of resources, high technology materials, and renewable and reusable resources. Essential reading for everyone concerned with materials issues and their import for the health of industrial economies, the future of materials research, and, ultimately, the quality of life.

Price for each Compendium: Retail: \$12.95 casebound, \$4.95 paperbound; AAAS Member: \$11.95 casebound, \$4.45 paperbound.
