SCIENCE is published weekly, except the last week in December, but with an extra issue on the third Tuesday in September, by the American Association for the Advancement of Science, 1515 Massachusetts Ave., NW, Washington, D.C. 20005. Now combined with The Scientific Monthly®. Second-class postage paid at Washington, D.C., and additional entry. Copyright © 1978 by the American Association for the Advancement of Science. Member rates on request. Annual subscriptions \$65; foreign postage: Canada \$10; other surface \$13; air-surface via Amsterdam \$30. Single copies \$2 by mail (back issues \$3) except Guide to Scientific Instruments \$6. School year subscriptions: 9 months \$50; 10 months \$55. Provide 6 weeks' notice for change of address, giving new and old addresses and postal codes. Send a recent address label, including your 7-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. SCIENCE is indexed in two general periodical indexes—Readers' Guide to Periodical Literature and Monthly Cumulating Periodical Index—and in several specialized indexes.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Transition Metal Compounds, *W. E. Hatfield*; Human Blood Groups,
R. E. Rosenfield 1474

REPORTS

Migration of Radioactive Wastes: Radionuclide Mobilization by Complexing Agents:
J. L. Means, D. A. Crerar, J. O. Duguid 1477

Breeding Patterns of Galápagos Penguins as an Indicator of Oceanographic
Conditions: *P. D. Boersma* 1481

Is Venus Concentrating Interplanetary Dust Toward Its Orbital Plane?:
N. Y. Misconi and J. L. Weinberg 1484

Initiation of Light Adaptation in Barnacle Photoreceptors: *J. Strong and J. Lisman* 1485

Nitrite and Nitrate Are Formed by Endogenous Synthesis in the Human Intestine:
S. R. Tannenbaum et al. 1487

Mercury Concentrations in Pacific Hake, *Merluccius productus* (Ayres), as a
Function of Length and Latitude: *N. H. Cutshall, J. R. Naidu, W. G. Pearcy* 1489

Biochemical Evidence for Keratinization by Mouse Epidermal Cells in Culture:
P. Steinert and S. H. Yuspa 1491

Thermorestitution of Mutagenic Radiation Damage in Bacterial Spores: *H. Tanooka* 1493

Sodium Channel Inactivation in Squid Axon Is Removed by High Internal pH or
Tyrosine-Specific Reagents: *M. S. Brodwick and D. C. Eaton* 1494

Cystic Fibrosis: Decreased Conjugation and Excretion of [¹⁴C]Spermidine:
M. G. Rosenblum et al. 1496

Is Binocular Vision Always Monocular?: *R. Blake and J. Camisa* 1497

Insecticidal Benzoylphenyl Ureas: Structure-Activity Relationships as Chitin
Synthesis Inhibitors: *N. P. Hajjar and J. E. Casida* 1499

Chronic Focal Epileptiform Discharges Induced by Injection of Iron into Rat and
Cat Cortex: *L. J. Willmore et al.* 1501

Intellectual Status of Working-Class Children Adopted Early into Upper-Middle-
Class Families: *M. Schiff et al.* 1503

Technical Comments: Role of Adipocyte Geometry in Eating Behavior: *R. L. Leibel*;
I. M. Faust, P. R. Johnson, J. Hirsch; Menarche and Fatness: Reexamination
of the Critical Body Composition Hypothesis: *J. Trussell; R. E. Frisch* 1504

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, the effectiveness of science in the promotion of human welfare, and to increase public understanding and of the importance and promise of the methods of science in human progress.

COVER

Galápagos penguins. The male (right) is preening the head of the female (left), who is self-preening. See page 1481. [P. Dee Boersma, University of Washington, Seattle]
