CE is published weekly on Friday, except the last week in December, by the American Association for the Advancement of Science, 1515 Massachusetts Avenue, NW, Washington, D.C. Second-class postage (publication No. 484469) paid at Washington, D.C., and at an additional entry. Now combined with The Scientist Monthly. Copyright © 1979 by the American Association for the Advancement of Science. Domestic individual membership and subscription (51 issues): $34. Domestic institutional subscription (51 issues): $70. Foreign postage extra: Canada $12, other (surface mail) $30. First class, airmail, school year, and student rates on request. Single copies $1.50 ($2 by mail); back issues $2.50 ($3 by mail); classroom rates on request. Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Postmaster: Send Form 3579 to Science, 1515 Massachusetts Avenue, NW, Washington, D.C. 20005. Science is in the Reader's Guide to Periodical Literature and in several specialized indexes.

Oxytocin Receptors: Triggers for Parturition and Lactation?; M. S. Soloff, M. Alexandrova, M. J. Fernstrom .......................... 1313

Role of Nuclear Size in Cell Growth Initiation: A. Yen and A. B. Pardee .......................... 1315

Linkage of Loci Controlling Alloantigens on Red Blood Cells and Lymphocytes in the Horse: E. Bailey et al. .......................... 1317

Eye Movements Initiate Visual-Motor Development in the Cat: A. Hein et al. .......................... 1321

An Extrinsic Membrane Polypeptide Associated with High-Molecular-Weight Protein Aggregates in Human Cataract: A. Spector et al. .......................... 1323

Development of the Capacity for Tactile Information Transfer Between Hemispheres in Normal Children: D. Galin et al. .......................... 1330

Search Image Formation in the Blue Jay (Cyanocitta cristata): A. T. Pietrewicz and A. C. Kamil .......................... 1332

Inherited Epilepsy: Spike-Wave and Focal Motor Seizures in the Mutant Mouse Tottering: J. L. Noebels and R. L. Sidman .......................... 1334

Perception of Echo Phase Information in Bat Sonar: J. A. Simmons .......................... 1336

On the Specificity of Kainic Acid: S. T. Mason and H. C. Fibiger .......................... 1339

Morphological Affinities of Pan paniscus: R. S. Corruccini and H. M. McHenry .......................... 1341

ACTH and Vasopressin Treatments Immediately After a Defeat Increase Future Submissiveness in Male Mice: K. E. Roche and A. J. Leshner .......................... 1343

Kitten with left eye immobilized by section of the cranial nerves serving the ocular muscles. Studies with animals in which the eye is immobilized either before or after exposure in light reveal the role of eye movement in developing visual-motor coordination. See page 1321. [Charles G. Taylor, Newton, Massachusetts]
