COVER

Leopard shark, *Triakis semifasciata*, shows the spots and grace of its feline namesake. This vigorous shark ranges along the western U.S. coast and serves as a frequent subject for elasmobranch research. See page 75. [Larry Ford, Scripps Aquarium, La Jolla, California]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to promote the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to increase the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
