COVER

With their general interest in dolphins, the ancient Greeks realized the animals could hear underwater and make sounds, but even Aristotle misunderstood their vocal capabilities. Greek coin from about 250 B.C. See page 676. [R. Stuart Mackay, Boston University, Boston, Massachusetts 02215]

The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
