COVER

Skull from the Del Mar site, California, discovered in 1929 by M. J. Rogers. A previously published amino acid date of 48,000 years for this anatomically modern individual has suggested that *Homo sapiens sapiens* appeared in the New World much earlier than in Europe or the Near East. New data indicate the Del Mar individual is much more recent. See page 1003. [Marvin Popkin, San Diego Museum of Man, San Diego, California]

American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to give the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.
