

AAAS announces its first annual colloquium on science, arms control, and national security. . .

Science and Security: The Future of Arms Control

December 4 – 5, 1986
Omni Shoreham Hotel
Washington, D.C.

This new and exciting event will bring together more than 300 science, government, business, and citizen leaders to examine in depth the key issues relating science, technology, and national security. By providing a wide range of viewpoints on a variety of questions, the colloquium will offer a balanced and thorough examination of complex arms control and national security issues.

Program

Plenary sessions

- ◆ Overview of the role of science and technology in shaping national security policy
- ◆ Advances in weapons technologies and their impact on security
- ◆ SDI: An evaluation of its strategic and technical merits
- ◆ Congress and nuclear arms control
- ◆ Technology and the Five Continent Peace Initiative
- ◆ How can science and technology help us create a safer world?

In addition, smaller group sessions designed to

encourage lively discussion and debate will focus on such critical issues as:

- ◆ verification and compliance
- ◆ weapons testing and nuclear proliferation
- ◆ Soviet technology and defense capabilities
- ◆ C3I and nuclear stability
- ◆ scientific community and defense research
