- SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with The Scientific Monthly® Copyright © 1987 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$65. Domestic institutional subscription (51 issues): \$98. Foreign postage extra: Canada \$32, other (surface mail) \$27, air-surface via Amsterdam \$65. First class, airmail, school-year, and student rates on request. Single copies \$2.50 (\$3 by mail); back issues \$4 (\$4.50 by mail); Biotechnology issue, \$5.50 (\$6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments \$16 (\$17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 \$1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER Artificial quantum box structure. Sketch (below) shows GaAs quantum boxes (in red) formed in molecular-beam-grown crystal by interdiffusion of surrounding layer areas. Photo (above) is image of boxes formed with their own luminescence in an electron microscope. The boxes are 1000 angstroms in size and are spaced 10 micrometers apart. See page 1023. [Figure prepared by A. C. Gossard and P. M. Petroff, AT&T Bell Laboratories, Murray Hill, NJ 07974]

- 1046 Construction of a General Human Chromosome Jumping Library, with Application to Cystic Fibrosis: F. S. COLLINS, M. L. DRUMM, J. L. COLE, W. K. LOCKWOOD, G. F. VANDE WOUDE, M. C. IANNUZZI
- 1049 Solution of a Protein Crystal Structure with a Model Obtained from NMR Interproton Distance Restraints: A. T. BRÜNGER, R. L. CAMPBELL, G. M. CLORE, A. M. GRONENBORN, M. KARPLUS, G. A. PETSKO *et al.*
- 1053 Isolation of an Olfactory cDNA: Similarity to Retinol-Binding Protein Suggests a Role in Olfaction: K.-H. LEE, R. G. WELLS, R. R. REED
- 1056 RNA Complementary to a Herpesvirus α Gene mRNA Is Prominent in Latently Infected Neurons: J. G. STEVENS, E. K. WAGNER, G. B. DEVI-RAO, M. L. COOK, L. T. FELDMAN
- 1059 Construction of Synthetic Immunogen: Use of New T-Helper Epitope on Malaria Circumsporozoite Protein: M. F. GOOD, W. L. MALOY, M. N. LUNDE, H. MARGALIT, J. L. CORNETTE, G. L. SMITH, B. MOSS, L. H. MILLER *et al.*
- 1062 Apogeous Roots in an Amazon Rain Forest: R. L. SANFORD, JR.
- 1064 Relationship Between the *c-myc* Locus and the 6q- Chromosomal Aberration in Leukemias and Lymphomas: C. BARLETTA, P.-G. PELICCI, L. C. KENYON, S. D. SMITH, R. DALLA-FAVERA
- 1068 Absence of Significant Cellular Dilution During ADH-Stimulated Water Reabsorption: K. STRANGE AND K. R. SPRING
- 1070 Arginine Vasopressin as a Thyrotropin-Releasing Hormone: M. D. LUMPKIN, W. K. SAMSON, S. M. MCCANN

Technical Comments

- 1073 *Trans*-activator Gene of HTLV-II: Interpretation: W. C. GREENE, W. J. LEONARD, Y. WANO, P. B. SVETLIK, N. J. PEPPER, J. G. SODROSKI, C. A. ROSEN, W. C. GOH, W. A. HASELTINE

AAAS Meetings

- 1088 *R&D Policies, Budgets, and Economic Competitiveness*: Advance Registration Form; Hotel Reservation Form

Book Reviews

- 1090 Arms Control Verification, Verification, and The Verification Challenge, *reviewed by* B. E. FRIDLING ■ Ring Complex Granites and Anorogenic Magmatism, J. Gittins ■ Introduction to Experimental Particle Physics, C. BLOCKER ■ Hypatia's Heritage, A. H. Koblitiz ■ Books Received

Software Reviews

- 1093 Personal Bibliographic Databases: R. E. WACHTEL

Products & Materials

- 1097 Flow Chart Software ■ Visual Stimulus System ■ Cell Culture System ■ Laboratory Freezer ■ Automatic Liquid Scintillation Counter ■ Nucleic Acid Purification Columns ■ HPLC Curve Resolution ■ 2-D Electrophoresis ■ Literature

Board of Directors

American Association for the Advancement of Science
Science serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

Publisher: William D. Carey

Editor: Daniel E. Koshland, Jr.

Deputy Editors: Philip H. Abelson (*Engineering and Applied Sciences*); John I. Brauman (*Physical Sciences*)

EDITORIAL STAFF

Managing Editor: Patricia A. Morgan

Assistant Managing Editors: Nancy J. Hartnagel, John E. Ringle

Senior Editors: Eleanore Butz, Ruth Kulstad

Associate Editors: Martha Collins, Barbara Jasny, Katrina L. Keiner, Edith Meyers, Phillip D. Szuroni, David F. Voss

Letters Editor: Christine Gilbert

Book Reviews: Katherine Livingston, *editor*; Deborah F. Washburn

This Week in Science: Ruth Levy Guyer

Chief Production Editor: Ellen E. Murphy

Editing Department: Lois Schmitt, *head*; Caitilin Gordon, Mary McDaniel, Barbara E. Patterson

Copy Desk: Lyle L. Green, Sharon Ryan, Beverly Shields, Anna Victoreen

Production Manager: Karen Schools

Graphics and Production: John Baker, *assistant manager*; Holly Bishop, Kathleen Cosimano, Eleanor Warner

Covers Editor: Grayce Finger

Manuscript Systems Analyst: William Carter

NEWS STAFF

News Editor: Barbara J. Culliton

News and Comment: Colin Norman, *deputy editor*; Mark H. Crawford, Constance Holden, Eliot Marshall, Marjorie Sun, John Walsh

Research News: Roger Lewin, *deputy editor*; Deborah M. Barnes, Richard A. Kerr, Gina Kolata, Jean L. Marx, Arthur L. Robinson, M. Mitchell Waldrop

European Correspondent: David Dickson

BUSINESS STAFF

Associate Publisher: William M. Miller, III

Business Staff Manager: Deborah Rivera-Wienhold

Membership Recruitment: Gwendolyn Huddle

Member and Subscription Records: Ann Ragland

Guide to Biotechnology Products and Instruments: Shauna S. Roberts

ADVERTISING REPRESENTATIVES

Director: Earl J. Scherago

Production Manager: Donna Rivera

Advertising Sales Manager: Richard L. Charles

Marketing Manager: Herbert L. Burkland

Sales: New York, NY 10036: J. Kevin Henebry, 1515 Broadway (212-730-1050); Scotch Plains, NJ 07076: C. Richard Callis, 12 Unami Lane (201-889-4873); Chicago, IL 60611: Jack Ryan, Room 2107, 919 N. Michigan Ave. (312-337-4973); San Jose, CA 95112: Bob Brindley, 310 S. 16 St. (408-998-4690); Dorset, VT 05251: Fred W. Diefenbach, Kent Hill Rd. (802-867-5581); Damascus, MD 20872: Rick Sommer, 24808 Shrubbery Hill Ct. (301-972-9270); U.K., Europe: Nicholas Jones, +44(0647)52918.

Instructions for contributors appears on page xi of the 19 December 1986 issue. Editorial correspondence, including requests for permission to reprint and reprint orders, should be sent to 1333 H Street, NW, Washington, DC 20005. Telephone: 202-326-6500.

Advertising correspondence should be sent to Tenth Floor, 1515 Broadway, NY 10036. Telephone 212-730-1050 or WU Telex 968082 SCHERAGO.

Materials Science

Materials science is currently experiencing major advances, both in basic understanding and in applications. Indeed, one of the great strengths of the field has been the close connection between the pure and applied aspects of the science. In this issue we present some exciting developments in materials science. Future issues will bring articles on areas not covered here.

Most of the topics are covered from the viewpoint of physical attributes rather than applications. In each article, however, we see a variety of applications to diverse areas ranging from structure to electronics. And, as the applications are broad, the field encompasses contributions from chemistry, solid-state physics, and electrical engineering, among others.

We start with disordered materials by Cheng and Johnson. Amorphous solids have been shown to have some remarkable properties. Active interests include synthesis of noncrystalline materials, atomic scale structural modeling, electronic structure and properties, transport and kinetic processes, and phase transitions. New conceptual developments deal with interesting aspects of the lack of long-range order. Glass describes new developments in optical materials. Display technologies have been a noteworthy area that has shown remarkable advances, but optics now appear in other areas of technology as well. These include optical devices at higher bandwidths than are possible with traditional methods, and the generation and transmission of very high energy densities (for example, in laser fusion) where spectacular advances are making new technologies viable.

Spaepen discusses recent advances in controlling the microstructure of metallic systems. Rapid solidification technology has revolutionized our ability to synthesize metals with new and important properties. In increasing order of metastability, the solidification product can be one with a finer grain size, a supersaturated solution, a metastable crystalline phase, or, if no crystallization occurs, a glass. One result has been the extraordinary discovery of icosahedral quasicrystals. Both metallic glasses as well as new crystalline materials play an important role. Ultrarapid heating and cooling techniques reveal new aspects of the kinetics of solidification.

Proceeding to more ordered materials, Baer, Hiltner, and Keith discuss hierarchical structure in polymeric materials, describing elegant new methods for controlling macroscopic properties by manipulating the chemical and physical aspects of synthesis. They focus on the molecular, nano-, micro-, and macrolevels and show how interactions at and between these levels affect each other. Semicrystalline, liquid crystalline, and amorphous polymers having flexible chains, rigid macromolecules, and multiphase components, respectively, have very different properties. From studies of biocomposites in natural polymeric systems important lessons can be learned and applied to synthetic materials.

Narayanamurti describes some exceptional examples of artificially structured materials. Molecular beam epitaxy and metal-organic chemical vapor deposition allow one to structure new materials on an atomic scale, resulting in the observation of new physical phenomena. New classes of electronic devices based on band-gap and wave function engineering arise from this work. New instrumentation plays a critical role in characterizing these materials.

Finally, Ehrenreich addresses the issue of theory in materials science. His insights into the role of theory in this strongly experimentally based science help tie together the basic science, its applications, and future developments that we may expect to see.

The diversity of the problems being attacked and solved, and the impressive progress already recorded, augurs well for more advances in this important science and technology. Helped by an also continuing advance in instrumentation and ancillary technologies, we expect continuing revelations.—JOHN I. BRAUMAN, *Department of Chemistry, Stanford University, Stanford, CA 94305*
