- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** The southwestern shore of Lake Nyos in Cameroon after the toxic gas disaster in August 1986 which killed an estimated 1700 people and several thousand livestock. A fountain of water created by the release of an estimated 1.0 cubic kilometer of gas washed over an 80-meter rock promontory causing a 90-centimeter drop in the lake's water level. See page 169.
