- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER Athapaskan wooden plaque mask. The mask "was created to tell the story of a woman who went to pick blueberries. But rather than collecting the fruit she danced with her basket, pretending to be industrious. The mask has many features similar to those employed by Bering Sea Eskimos and of religious significance to them. These include a down-turned mouth and chin tattoos, symbols of females; a pair of goggles, an indication of a supernatural quality; and hoops and feathers, references to celestial bodies. The symmetry of the mask is typical of Athapaskan workmanship as are the woman's red cheek spots." [University Museum Anvik NA 5822b; collected by L. Dimoski; accessioned 1917. Height 31.9 centimeters excluding feathers. From *Raven's Journey*, reviewed on page 1005]
