

263 This Week in *Science*

## Editorial

265 Academic-Industrial Interactions

## Perspective

267 The Protein Folding Problem: T. E. CREIGHTON

## Letters

268 NIH Drug Tests: J. M. WALSH; C. HOLDEN ■ The Windscale Legacy: D. LOWRY

## News & Comment

271 Breakthrough for Education at NSF?

273 Test Ban Test Back on Track

274 Voodoo Science

277 Japanese Views on Science Compare to U.S. Attitudes

278 Editorial Changes for Einstein Papers

279 *Briefing*: Nobel Prizes Go Up ■ More NAE News Members ■ Duesberg Gets His Day in Court ■ Telescope Builder Lured Back to Europe

## Research News

280 Superconductivity: The FAX Factor

282 Race for Cystic Fibrosis Gene Nears End

286 Hypercube Breaks a Programming Barrier

## Articles

287 Adaptability of the U.S. Industrial Relations System: T. A. KOCHAN

293 The Greenhouse Theory of Climate Change: A Test by an Inadvertent Global Experiment: V. RAMANATHAN

300 Action at a Distance Along a DNA: J. C. WANG AND G. N. GIAEVER

## Research Articles

305 Tryptophan-Requiring Mutants of the Plant *Arabidopsis thaliana*: R. L. LAST AND G. R. FINK

## Reports

311 Regulation of Interprotein Electron Transfer by Residue 82 of Yeast Cytochrome c: N. LIANG, A. G. MAUK, G. J. PIELAK, J. A. JOHNSON, M. SMITH, B. M. HOFFMAN

- SCIENCE is published weekly on Friday, except the last week in December, and with an extra issue in February by the American Association for the Advancement of Science, 1333 H Street, NW, Washington, DC 20005. Second-class postage (publication No. 484460) paid at Washington, DC, and at an additional entry. Now combined with *The Scientific Monthly* © Copyright © 1988 by the American Association for the Advancement of Science. The title SCIENCE is a registered trademark of the AAAS. Domestic individual membership and subscription (51 issues): \$65. Domestic institutional subscription (51 issues): \$98. Foreign postage extra: Canada \$32, other (surface mail) \$27, air-surface via Amsterdam \$65. First class, airmail, school-year, and student rates on request. Single copies \$3.00 (\$3.50 by mail); back issues \$4.50 (\$5.00 by mail); Biotechnology issue, \$5.50 (\$6 by mail); classroom rates on request; Guide to Biotechnology Products and Instruments \$16 (\$17 by mail). Change of address: allow 6 weeks, giving old and new addresses and seven-digit account number. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$1 per copy plus \$0.10 per page is paid directly to CCC, 21 Congress Street, Salem, Massachusetts 01970. The identification code for Science is 0036-8075/83 \$1 + .10. Postmaster: Send Form 3579 to Science, 1333 H Street, NW, Washington, DC 20005. Science is indexed in the *Reader's Guide to Periodical Literature* and in several specialized indexes.
- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** Auxotrophic *trp1-1* mutants of *Arabidopsis thaliana*, blocked in anthranilate phosphoribosyl transferase, are fluorescent under ultraviolet light due to accumulation of intermediates in the pathway of tryptophan biosynthesis. The middle column of fluorescent mutant plants is surrounded by larger, nonfluorescent wild-type *A. thaliana* plants. See page 305. [Robert L. Last, Whitehead Institute for Biomedical Research, Cambridge, MA 02142]

- 314 Three-Dimensional Solution Structure of Plastocyanin from the Green Alga *Scenedesmus obliquus*: J. M. MOORE, D. A. CASE, W. J. CHAZIN, G. P. GIPPERT, T. F. HAVEL, R. POWLS, P. E. WRIGHT
- 317 Yeast HAP2 and HAP3: Transcriptional Activators in a Heteromeric Complex: S. HAHN AND L. GUARENTE
- 321 Interleukin-1 Immunoreactive Innervation of the Human Hypothalamus: C. D. BREDER, C. A. DINARELLO, C. B. SAPER
- 324 Molecular Cloning of Human and Rat Complementary DNA Encoding Androgen Receptors: C. CHANG, J. KOKONTIS, S. LIAO
- 327 Cloning of Human Androgen Receptor Complementary DNA and Localization to the X Chromosome: D. B. LUBAHN, D. R. JOSEPH, P. M. SULLIVAN, H. F. WILLARD, F. S. FRENCH, E. M. WILSON
- 330 Functional Expression of a New Pharmacological Subtype of Brain Nicotinic Acetylcholine Receptor: K. WADA, M. BALLIVET, J. BOULTER, J. CONNOLLY, E. WADA, E. S. DENERIS, L. W. SWANSON, S. HEINEMANN, J. PATRICK
- 334 Exon-Intron Organization in Genes of Earthworm and Vertebrate Globins: S. M. JIANG, J. R. GAREY, A. F. RIGGS
- 336 Oral *Salmonella typhimurium* Vaccine Expressing Circumsporozoite Protein Protects Against Malaria: J. C. SADOFF, W. R. BALLOU, L. S. BARON, W. R. MAJARIAN, R. N. BREY, W. T. HOCKMEYER, J. F. YOUNG, S. J. CRYZ, J. OU *et al.*
- 338 Increased Attention Enhances Both Behavioral and Neuronal Performance: H. SPITZER, R. DESIMONE, J. MORAN

## Book Reviews

- 341 Historical Studies in the Physical Sciences, vol. 8, part 1, *reviewed by* K. HUFBAUER ■ Genetic Constraints on Adaptive Evolution, M. KIRKPATRICK ■ Evolution of the Lewisian and Comparable Precambrian High Grade Terrains, R. ST. J. LAMBERT ■ Experimental Fluvial Geomorphology, R. SLINGERLAND ■ Books Received

## Products & Materials

- 345 Monoclonal Antibody Purifier ■ Planar Liquid Chromatography ■ Stability-Variance Software ■ Densitometer ■ Biocompatible Chromatograph ■ Laboratory Application Language ■ DNA Synthesizer ■ Literature

### Board of Directors

**American Association for the Advancement of Science**  
*Science* serves its readers as a forum for the presentation and discussion of important issues related to the advancement of science, including the presentation of minority or conflicting points of view, rather than by publishing only material on which a consensus has been reached. Accordingly, all articles published in *Science*—including editorials, news and comment, and book reviews—are signed and reflect the individual views of the authors and not official points of view adopted by the AAAS or the institutions with which the authors are affiliated.

**Publisher:** Alvin W. Trivelpiece

**Editor:** Daniel E. Koshland, Jr.

**Deputy Editors:** Philip H. Abelson (*Engineering and Applied Sciences*); John I. Brauman (*Physical Sciences*)

#### EDITORIAL STAFF

**Managing Editor:** Patricia A. Morgan

**Assistant Managing Editor:** Nancy J. Hartnagel

**Senior Editors:** Eleanore Butz, Ruth Kulstad

**Associate Editors:** Martha Coleman, R. Brooks Hanson, Barbara Jasny, Katrina L. Kelner, Edith Meyers, Phillip D. Szuroimi, David F. Voss

**Letters Editor:** Christine Gilbert

**Book Reviews:** Katherine Livingston, *editor*; Deborah F. Washburn

**This Week in Science:** Ruth Levy Guyer

**Contributing Editor:** Lawrence I. Grossman

**Chief Production Editor:** Ellen E. Murphy

**Editing Department:** Lois Schmitt, *head*; Mary McDaniel, Patricia L. Moe, Barbara E. Patterson

**Copy Desk:** Joi S. Granger, Beverly Shields, Anna Victoreen, Barbara Wittig

**Production Manager:** Karen Schools

**Assistant Production Manager:** James Landry

**Graphics and Production:** Holly Bishop, James J. Olivari

**Covers Editor:** Grayce Finger

**Manuscript Systems Analyst:** William Carter

#### NEWS STAFF

**News Editor:** Barbara J. Culliton

**News and Comment:** Colin Norman, *deputy editor*; William Booth, Mark H. Crawford, Constance Holden, Eliot Marshall, Marjorie Sun, John Walsh

**Research News:** Roger Lewin, *deputy editor*; Deborah M. Barnes, Richard A. Kerr, Jean L. Marx, Leslie Roberts, M. Mitchell Waldrop

**European Correspondent:** David Dickson

#### BUSINESS STAFF

**Business Staff Manager:** Deborah Rivera-Wienhold

**Classified Advertising Supervisor:** Karen Morgenstern

**Membership Recruitment:** Gwendolyn Huddle

**Member and Subscription Records:** Ann Ragland

**Guide to Biotechnology Products and Instruments:** Shauna S. Roberts

#### ADVERTISING REPRESENTATIVES

**Director:** Earl J. Scherago

**Traffic Manager:** Donna Rivera

**Traffic Manager (Recruitment):** Gwen Canter

**Advertising Sales Manager:** Richard L. Charles

**Employment Sales Manager:** Edward C. Keller

**Marketing Manager:** Herbert L. Burkland

**Sales:** New York, NY 10036: J. Kevin Henebry, 1515 Broadway (212-730-1050); Scotch Plains, NJ 07076: C. Richard Callis, 12 Unami Lane (201-889-4873); Chicago, IL 60611: Jack Ryan, Room 2107, 919 N. Michigan Ave. (312-337-4973); San Jose, CA 95112: Bob Brindley, 310 S. 16 St. (408-998-4690); Dorset, VT 05251: Fred W. Dieffenbach, Kent Hill Rd. (802-867-5581); Damascus, MD 20872: Rick Sommer, 24808 Shrubbery Hill Ct. (301-972-9270); U.K., Europe: Nick Jones, +44(0647)52918; Telex 42513; FAX (0392) 31645.

Advertising correspondence should be sent to Tenth Floor, 1515 Broadway, NY 10036. Telephone 212-730-1050 or WU Telex 968082 SCHERAGO.

## Academic-Industrial Interactions

The rationale and mechanisms for public support of research in the physical sciences, mathematics, and engineering are undergoing profound and probably irreversible change. Where once the federal government was essentially the sole source of research funds for universities, the states and industry are becoming significant factors. In an earlier day, the widely held view was that federal sponsorship of basic research would automatically lead to societal benefits, including innovative applications and industrial competitiveness. The belief was more or less valid for the United States at a time when this country was the world's unchallenged leader in technology.

This nation will encounter tough global industrial competition for the foreseeable future. In this circumstance, it is the states rather than the federal government that have been highly innovative. Today, there are 500 state and local high-tech programs in 45 states aimed at improving economic competitiveness.

The recession in 1981 brought hardship and 15% unemployment to the states of the Rust Belt such as Ohio. It was good politics in the Rust Belt to create programs that used state funds to create jobs, to support innovation by small companies, and to facilitate university-industrial collaboration. At least ten different types of programs have been devised, such as research parks, incubators, and provision of venture capital, but the major activities involve university research or industrial extension services. Appropriations are usually leveraged by contributions from industry that match or exceed those from the state. An exuberant report from Pennsylvania tells that in the interval from 1983 to 1987, more than 10,500 jobs were created or retained and that \$76.6 million in state funds attracted more than \$280 million in private investment. Virtually all the colleges and universities (public and private) of Pennsylvania are members of a partnership that interacts with 2500 firms. More than half are small enterprises that could not afford to maintain research activities on their own.

In Ohio several programs foster start-up companies. However, the major emphasis is on future-oriented major industrial-university interactions. At nine Edison Technology Centers, academic researchers work on industrial problems especially relevant to the state. Each center is built around the problems of a single set of technologies such as advanced manufacturing, polymer innovation, or welding engineering. Each center has a number of companies and academic institutions as members. More than 500 companies and every university in the state participate.

Activities in New Jersey appear to be unusually well conceived. A \$90-million state bond issue provided funds for buildings and equipment. Management of the enterprise is vested in a commission on science and technology whose members include bipartisan legislators, university presidents, and highly competent scientists and engineers. Among the various programs being supported, major emphasis is on advanced technology centers, eight of which are in operation. Among the fields covered are advanced scientific computing, industrial ceramics, biotechnology and medicine, computer aids for industrial productivity, and plastics recycling. In the future, centers for photonics and surface modification may be established.

Texas has created what amounts to a science foundation that will support local basic and applied research. Eligible fields for basic research are mainly in the physical sciences and mathematics, but biological, behavioral, and social sciences are included. The biennial appropriation for basic research is \$20 million. The corresponding funds for an Advanced Technology Program are \$40 million. Among the fields to be supported are aerospace, biotechnology, manufacturing technology, materials science, and micro-electronics. Proposals will be reviewed by out-of-state scientists and engineers, but final authority resides in a 12-member board whose background is predominantly science and engineering.

The states have initiated many programs aimed at improving their ability to use science and technology. Similarities among the programs abound, but all differ in detail, whether in strategy, tactics, or management. It is too early to judge what will prove best, but indications are that initiatives have been largely successful and that the efforts are expanding.

—PHILIP H. ABELSON
