- The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objects are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

COVER Mapping the muscle glycogen phosphorylase gene on human chromosome 11 by chromosomal in situ suppression (CISS) hybridization. Fluorescent signals from the dinitrophenol-labeled cosmid probe are visualized as yellow dots on the propidium iodide (red) counterstained chromosome spread. See p. 64.
