■ The American Association for the Advancement of Science was founded in 1848 and incorporated in 1874. Its objectives are to further the work of scientists, to facilitate cooperation among them, to foster scientific freedom and responsibility, to improve the effectiveness of science in the promotion of human welfare, to advance education in science, and to increase public understanding and appreciation of the importance and promise of the methods of science in human progress.

**COVER** Cover pages from three French popular works of (from left) 1903, 1860, and 1893. The illustrations are from *La Science pour tous* (reviewed on page 980), an account of French efforts to bring science to a popular audience in the period 1850 to 1914. Our expanded book review section also includes reviews on topics ranging from Darwin's illnesses to cold fusion, Halley's comet to urban archeology, and macromolecular thermodynamics to endangered ecosystems.
