This Week in Science

Editorial

Toxic Chemicals and Toxic Laws

Letters

Pedestals and Glass Ceilings: R. Hubbard; G. A. Fulford
Understanding Evolution: M. J. Behe
Immortal Sequence: J. B. Kaper and H. L. T. Mobley
Children and Divorce: M. Weissman; D. M. Capaldi and G. R. Patterson; Response: A. J. Cherlin
Patent Validity: M. Berninger

ScienceScope

Dragging the Academy into EMF studies; duking it out over fetal tissue research; etc.

Cover. This image of the enormous hydrogen coma surrounding Comet Halley was obtained by the Pioneer Venus Orbiter over a 5-day period in early February 1986. The image was constructed from over 9000 data points that were obtained as the spin axis of the rotating spacecraft was held fixed and the comet drifted across the instrument field of view. The false-color image, embellished by white constant-brightness contours, shows the Lyman-α brightness distribution at 1216 angstroms. The spacecraft is now headed toward a fiery death in the upper atmosphere of Venus in the fall of 1992. See page 1008. [Image processing by A. I. F. Stewart and M. R. Combi]

Reports

1010 Allerød—Younger Dryas Lake Temperatures from Midge Fossils in Atlantic Canada: I. R. Walker, R. J. Mott, J. P. Smol

1012 Global Test Matching for Information Retrieval: G. Salton and C. Buckley
