ADJUSTING THE COLLEGE TO AMERICAN
LIFE¹

CONTENTS

<i>The American Association for the Advancement of Science:—</i>	
<i>Adjusting the College to American Life:</i> DR. ABRAHAM FLEXNER	361
<i>Danger arising from the Popularization of the College:</i> PROFESSOR WILLIAM NORTH RICE	372
<i>The Paleontological Society</i>	376
<i>Engineers of Wisconsin form State Society</i> ..	376
<i>The Darwin Centenary</i>	377
<i>The Carnegie Foundation for the Advancement of Teaching</i>	378
<i>Scientific Notes and News</i>	379
<i>University and Educational News</i>	382
<i>Discussion and Correspondence:—</i>	
<i>Forest Preservation:</i> DR. ALLERTON B. CUSHMAN. <i>Magnetic Rocks:</i> DR. G. D. HARRIS. <i>New Phenomenon in Electric Discharge:</i> PROFESSOR FRANCIS E. NIPHER. <i>The Dating of Publications:</i> DR. MAX MORSE	383
<i>Scientific Books:—</i>	
<i>Deegener on Die Metamorphose der Insekten:</i> PROFESSOR WILLIAM MORTON WHEELER. <i>C.-E. A. and A. R. Winslow on The Systematic Relationships of the Coccaceæ:</i> PROFESSOR F. P. GORHAM. <i>Crane on Gold and Silver:</i> DR. THEO. B. COMSTOCK. <i>Voss Ueber das Wesen der Mathematik:</i> PROFESSOR G. A. MILLER	384
<i>Scientific Journals and Articles</i>	392
<i>A New Variety of Asymmetry exhibited by the Nitrogen Atom:</i> PROFESSOR J. BISHOP TINGLE	393
<i>Russian Research in Metabolism:</i> DR. FRANCIS G. BENEDICT	394
<i>Special Articles:—</i>	
<i>A Mendelian View of Sex Heredity:</i> PROFESSOR W. E. CASTLE	395

FROM a constructive point of view, the existing college represents for the most part tendencies rather than design. It has in the main simply come to be what it now is. True, the gardeners have pruned a bit here and tied up a bit there. But the hedge has been trampled down, and things have been suffered to grow with less regard to the demands of the market than to the fertility of the soil. Provisionally, this style of farming has its advantages. It at least instructs us as to what will grow under given conditions. There comes a time, however, when indiscriminate abundance and variety must submit to a process of evaluation; when wasteful natural productivity is no longer best adapted to meet the demonstrated or calculable needs of a well-defined social organization; when, in a word, we must ask which part of the crop has value, and to what end. This necessity is, I take it, reflected in the question proposed for to-day's discussion.

Two things have happened in higher education during the last thirty years: in the richer and more progressive sections of the country the traditional one-curriculum college has been practically demolished; the graduate school has been evolved. The demolition of the old-fashioned college helped, of course, to make a clearing for the graduate school, and the concurrent growth of the graduate school

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

¹ An address given before the Section of Education at the Baltimore meeting of the American Association for the Advancement of Science.
