

What if staying up to date with the latest technology published in journals and patents were as easy as pushing a button?

It is.

With the “Keep Me Posted” alerting feature, SciFinder sends you automatic updates on areas you—and your competitors—are interested in.

You can monitor specific research topics, companies, authors, substances, or sequences, and choose how frequently you receive notifications: daily, monthly, or weekly.

The service isn't just convenient, it's incredibly current. Journal article records often appear in SciFinder before they're even in print. New references, substances, and sequences are added daily. Patents from all the major offices are added within two days of issuance.

As with all SciFinder features, Keep Me Posted is integrated with your workflow. At any point in a search (including the beginning), simply click on the Keep Me Posted button. SciFinder tracks your steps and will generate the appropriate alert—even for complex topics. When you receive a notification, you can follow each reference as you would in a search: find citing or cited articles (with links to the electronic full text), and follow referenced substances and reactions for further information.

Comprehensive, intuitive, seamless—SciFinder doesn't just alert you, it's part of the process. To find out more, call us at 800-753-4227 (North America) or 614-447-3700 (worldwide) or visit www.cas.org.
