

## COVER

A black-chinned hummingbird (*Archilochus alexandri*) drinks nectar from a flower of wild tobacco (*Nicotiana attenuata*). Nicotine in the nectar moderates its consumption by the hummingbird and protects against predators; the flower lip produces benzyl acetone, which attracts pollinators. Together, the repellent and attractant maximize the plant's reproductive fitness. See page 1200.

## MEDICINE

## Seeding and Propagation of Untransformed Mouse Mammary Cells in the Lung

K. Podsypanina et al.

In mice, normal mammary cells can colonize the lung, suggesting that metastases might arise from displaced normal cells acquiring genetic changes that confer malignancy.

10.1126/science.1161621

## APPLIED PHYSICS

## Time Reversal and Negative Refraction

J. B. Pendry

Optically active materials with nonlinear optical properties are predicted to mimic negatively refractive materials but without losses associated with true negative refraction.

## REPORTS CONTINUED...

## CHEMISTRY

## Hydrodefluorination of Perfluoroalkyl Groups Using Silylium-Carborane Catalysts 1188

C. Douvris and O. V. Ozerov

A catalytic cycle using boron-carbon compounds efficiently converts C–F to C–H bonds and thus can destabilize environmentally persistent fluorocarbons. >> *Perspective p. 1168*

## CHEMISTRY

## Inverse Velocity Dependence of Vibrationally Promoted Electron Emission from a Metal Surface 1191

N. H. Nahler et al.

Vibrationally excited nitric oxide molecules unexpectedly ionize a surface more efficiently at slower approach velocities, apparently because there is more time for charge transfer.

## GEOPHYSICS

Weak Interplate Coupling by Seamounts and Repeating  $M \sim 7$  Earthquakes 1194

K. Mochizuki et al.

More earthquakes occur in front of a subducting seamount east of Japan than over and behind it, implying that the subducting and overriding plates are weakly coupled. >> *Perspective p. 1165*

## PALEOCLIMATE

Limits for Combustion in Low O<sub>2</sub> Redefine Paleoaerospheric Predictions for the Mesozoic 1197

C. M. Belcher and J. C. McElwain

Combustion experiments under realistic atmospheric conditions show that charcoal layers in Mesozoic rocks require a higher level of atmospheric oxygen than previously was thought.

## PLANT SCIENCE

## Field Experiments with Transformed Plants Reveal the Sense of Floral Scents 1200

D. Kessler, K. Gase, I. T. Baldwin

Genetic manipulation of wild tobacco plants balances the use of scent to attract pollinators and toxin to limit nectar consumption in order to optimize reproduction.

>> *Perspective p. 1163; Science Podcast*

## MICROBIOLOGY

## Redox-Active Antibiotics Control Gene Expression and Community Behavior in Divergent Bacteria 1203

L. E. P. Dietrich, T. K. Teal, A. Price-Whelan, D. K. Newman

In addition to an antiseptic function, phenazines—pigmented antibiotics made by bacteria—organize colony structure by activating a superoxidative stress regulator.

## STRUCTURAL BIOLOGY

## Solution Structure of the Integral Human Membrane Protein VDAC-1 in Detergent Micelles 1206

S. Hiller et al.

A channel that allows diffusion of metabolites across the mitochondrial outer membrane forms an unusual 19-stranded  $\beta$  barrel with a pore size of about 25 angstroms.

## BIOCHEMISTRY

## A Structural Mechanism for MscS Gating in Lipid Bilayers 1210

V. Vásquez et al.

Electron paramagnetic resonance measurements reveal that tilting of transmembrane helices facilitates the opening of a bacterial mechanosensitive channel in a lipid bilayer.

>> *Perspective p. 1166; Research Article p. 1179*

## ECOLOGY

## Pre-Columbian Urbanism, Anthropogenic Landscapes, and the Future of the Amazon 1214

M. J. Heckenberger et al.

Archaeology and remote sensing of an Amazon basin show that its pre-Columbian inhabitants lived in distributed towns, villages, and hamlets connected by roads. >> *News story p. 1151*

## DEVELOPMENTAL BIOLOGY

## Induced Pluripotent Stem Cells Generated from Patients with ALS Can Be Differentiated into Motor Neurons 1218

J. T. Dimos et al.

Skin cells from elderly individuals with a mutation that causes amyotrophic lateral sclerosis (ALS) were used to derive stem cells that could then be differentiated. >> *Perspective p. 1169*

## NEUROSCIENCE

Amyloid- $\beta$  Dynamics Correlate with Neurological Status in the Injured Human Brain 1221

D. L. Brody et al.

After brain injury of normal people, the amount of an Alzheimer's disease peptide decreases in the extracellular fluid of the brain, returning to normal with recovery. >> *Science Podcast*
