COVER

False-color scanning electron micrograph of oriented vaterite, a crystalline polymorph of calcium carbonate, formed through template-controlled nucleation. Formation starts with the aggregation of prenucleation clusters forming an amorphous phase from which the crystals develop at the template surface. This experimental process may be analogous to the natural formation of seashells and other marine skeletons. See page 1455.

RESEARCH ARTICLES

- 1443** Wind-Driven Upwelling in the Southern Ocean and the Deglacial Rise in Atmospheric CO₂
R. F. Anderson et al.
Ventilation of carbon dioxide from the Southern Ocean preceded the last deglaciation.
>> *Perspective p. 1434*
- 1448** The Dynamic Control of Kiss-And-Run and Vesicular Reuse Probed with Single Nanoparticles
Q. Zhang et al.
A transient form of vesicle fusion that allows vesicle reuse is more prevalent early during synaptic response to a train of stimuli.

REPORTS

- 1453** Explosive Percolation in Random Networks
D. Achlioptas et al.
Simulations show that transitions in the connectivity within a random network can occur discontinuously.
>> *Perspective p. 1438*
- 1455** The Initial Stages of Template-Controlled CaCO₃ Formation Revealed by Cryo-TEM
E. M. Pouget et al.
Amorphous mineral particles attached to an ordered organic monolayer play a role in the crystallization of calcium carbonate.
- 1458** Self-Repairing Oxetane-Substituted Chitosan Polyurethane Networks
B. Ghosh and M. W. Urban
A polymer is modified to include a reactive group that can repair mechanical damage by exposure to ultraviolet light.
>> *Science Podcast*
- 1461** Nonporous Organic Solids Capable of Dynamically Resolving Mixtures of Diiodoperfluoroalkanes
P. Metrangolo et al.
An ionic crystal that traps iodine-capped fluorocarbons selectively and reversibly has potential for industrial separations.
- 1464** Time-Resolved Molecular Frame Dynamics of Fixed-in-Space CS₂ Molecules
C. Z. Bisgaard et al.
Transient alignment of CS₂ molecules by a short laser pulse allows resolution of otherwise obscured reaction dynamics.
- 1468** Clear Sky Visibility Has Decreased over Land Globally from 1973 to 2007
K. Wang et al.
The concentration of atmospheric aerosols has decreased over Europe but not over the tropics or the Southern Hemisphere.

- 1470** Recent Changes in Phytoplankton Communities Associated with Rapid Regional Climate Change Along the Western Antarctic Peninsula
M. Montes-Hugo et al.
Chlorophyll concentration has decreased by 12% over 30 years of ice retreat, with consequences for vertebrate populations.
- 1473** A Recessive Mutation in the APP Gene with Dominant-Negative Effect on Amyloidogenesis
G. Di Fede et al.
A mutation in the amyloid precursor protein gene causes Alzheimer's disease in homozygotic patients.
- 1477** Structure of the Anaphase-Promoting Complex/Cyclosome Interacting with a Mitotic Checkpoint Complex
F. Herzog et al.
Electron microscopy captures cell cycle checkpoint proteins in the act of inhibiting cell division in HeLa cells.
- 1481** A Functional Genomics Approach Reveals CHE as a Component of the *Arabidopsis* Circadian Clock
J. L. Pruneda-Paz et al.
A transcription factor (CHE) binds the promoter of the clock gene *CCA1*, adding to the molecular clock circuitry in plants.
>> *Perspective p. 1440*
- 1485** Paternal Control of Embryonic Patterning in *Arabidopsis thaliana*
M. Bayer et al.
Transcripts of a cytoplasmic gene from sperm are translated after fertilization and control asymmetric zygotic division.
>> *Perspective p. 1439*
- 1488** Preferential Generation of Follicular B Helper T Cells from Foxp3⁺ T Cells in Gut Peyer's Patches
M. Tsuji et al.
Suppressor T cells selectively differentiate into helper T cells in the mouse gut and thereby promote immune homeostasis.
- 1492** Selective Erasure of a Fear Memory
J.-H. Han et al.
Fear memory in mice is erased by experimental killing of a subpopulation of lateral amygdala neurons.
>> *Science Podcast*
- 1496** Human Substantia Nigra Neurons Encode Unexpected Financial Rewards
K. A. Zaghoul et al.
Dopamine neurons in the human mid-brain are activated by unexpected rewards and differentiate positive and negative feedback.

page 1436

page 1500

- 1500** RSY-1 Is a Local Inhibitor of Presynaptic Assembly in *C. elegans*
M. R. Patel and K. Shen
The protein RSY-1 inhibits synapse formation by antagonizing assembly molecules during presynaptic development.
- 1503** The Role of Fingerprints in the Coding of Tactile Information Probed with a Biomimetic Sensor
J. Scheibert et al.
Fingertip ridges improve the tactile perception of fine features.
