COVER

Animal domestication has been key to the development of human societies. The sequence of the bovine genome reveals new insights into the history and biology of cattle. See pages 522 and 528, and related research on horse and sheep genetics and domestication on pages 485 and 532.

T. Kawasaki et al.

The origin of chirality in asymmetric autocatalysis is due to carbon isotope substitution.

- 495 A Global View of the Lithosphere-Asthenosphere Boundary

C. A. Rychert and P. M. Shearer

Seismic imaging reveals a global velocity anomaly at depths of 70 to 100 kilometers that may be from some melt or a strong fabric in Earth's mantle.
