Cover:
Animal domestication has been key to the development of human societies. The sequence of the bovine genome reveals new insights into the history and biology of cattle. See pages 522 and 528, and related research on horse and sheep genetics and domestication on pages 485 and 532.

REVIEW
481 Fire in the Earth System
D. M. J. S. Bowman et al.

BREVIA
485 Coat Color Variation at the Beginning of Horse Domestication
A. Ludwig et al.
As part of the domestication process, humans appear to have selectively bred color variants of horses.

REPORTS
486 The Disappearance of the Progenitors of Supernovae 1993J and 2003gd
J. R. Maund and S. J. Smartt
The presumed progenitor stars of supernovae are indeed absent in later images from these sites.

488 Greatly Increased Toughness of Infiltrated Spider Silk
S.-M. Lee et al.
Infiltration of spider silk with impurities enhances the mechanical performance.

492 Asymmetric Autocatalysis Triggered by Carbon Isotope (13C/12C) Chirality
T. Kawasaki et al.
The origin of chirality in asymmetric autocatalysis is due to carbon isotope substitution.

495 A Global View of the Lithosphere-Asthenosphere Boundary
C. A. Rychert and P. M. Shearer
Seismic imaging reveals a global velocity anomaly at depths of 70 to 100 kilometers that may be from some melt or a strong fabric in Earth’s mantle. >> Perspective p. 474

499 Seismic Evidence for Sharp Lithosphere-Asthenosphere Boundaries of Oceanic Plates
H. Kawakatsu et al.
Detection of the presence of melt at variable depth beneath two oceanic plates reveals the vertical extent of old oceanic plates. >> Perspective p. 474

502 Subducting Slab Ultra-Slow Velocity Layer Coincident with Silent Earthquakes in Southern Mexico
T.-R. A. Song et al.
Seismic mapping suggests that silent earthquakes may be related to an ultra-slow velocity layer on top of a subducting slab.

506 14CH4 Measurements in Greenland Ice: Investigating Last Glacial Termination CH4 Sources
V. V. Petrenko et al.
Radiocarbon measurements show that wetlands were responsible for the rapid increase of atmospheric methane concentration during the last deglaciation. >> Perspective p. 477

509 Tuning the Activation Threshold of a Kinase Network by Nested Feedback Loops
Q. A. Justman et al.
Interacting negative feedback loops control the sensitivity of amphibian oocytes to the hormone progesterone. >> Perspective p. 476

513 Catalytic Core of a Membrane-Associated Eukaryotic Polyphosphate Polymerase
M. Hothorn et al.
A yeast membrane protein complex contains a domain that generates linear phosphate polymers from adenosine triphosphate.

516 Homeostatic Sleep Pressure and Responses to Sustained Attention in the Suprachiasmatic Area
C. Schmidt et al.
After prolonged wakefulness, people who are “night owls” do better at mental tests than those who are “early birds.”

519 Intuition and Deliberation: Two Systems for Strategizing in the Brain
W.-J. Kuo et al.
Optimal gaming requires matching the type of neural circuitry (intuitive versus deliberative) to the type of game.

522 The Genome Sequence of Taurine Cattle: A Window to Ruminant Biology and Evolution
The Bovine Genome Sequencing and Analysis Consortium

528 Genome-Wide Survey of SNP Variation Uncovers the Genetic Structure of Cattle Breeds
The Bovine HapMap Consortium
A survey of genetic diversity of cattle suggests two domestication events in Asia and selection by husbandry. >> Perspective p. 478; Science Podcast

532 Revealing the History of Sheep Domestication Using Retrovirus Integrations
B. Chessa et al.
Sheep retroviruses can be used to map the selective preferences of early farmers and trace livestock movements across Europe. >> Science Podcast

Closer Look at Einstein’s Brain

A new anatomical study reveals unusual features in the physicist’s parietal lobes.

The Mother of All Pileups

Crash of giant gas clouds suggests dark matter’s hand.

SCIENCE SIGNALING

www.sciencesignaling.org

The Signal Transduction Knowledge Environment

EDITORIAL GUIDE: Demystifying mTOR Signaling

N. R. Gough

The field of mTOR signaling is rapidly advancing.

PERSPECTIVE: The Pharmacology of mTOR Inhibition

D. A. Guertin and D. M. Sabatini

The quest for effective cancer therapies reveals insight into the regulation and function of the mammalian target of rapamycin.

PERSPECTIVE: Immune Regulation by Rapamycin: Moving Beyond T Cells

M. R. Janes and D. A. Fruman

Rapamycin regulates immune responses, in part, through its effects on macrophages and dendritic cells.

PERSPECTIVE: Akt Demoted in Glioblastoma

P. K. Vogt and J. R. Hart

PKCα is an essential component of a pathway linking EGFR signaling to mTOR and cell proliferation in glioblastoma.

PERSPECTIVE: New Insights into mTOR Signaling—mTORC2 and Beyond

D. R. Alessi et al.

mTORC2 promotes the phosphorylation of AGC kinase substrates at two distinct sites.

PODCAST

M. B. Yaffe and A. M. VanHook

Science Signaling’s Chief Scientific Editor gives an overview of mTOR signaling.

SCIENCE CAREERS

Free Career Resources for Scientists

Special Feature: The Other Parts of Your Academic Job

J. Austin

Research gets more attention, but teaching and service are also important parts of an academic career.

Teach the Students You Have

S. Carpenter

To teach well, take a scholarly approach and make your expectations clear.

Professional Service

E. Pain

Institutional service may be an annoyance, but you still need to do your part.
Science 324 (5926), 435-537.
