COVER

Africa is the source of all modern humans. A genetic study of 121 populations from across the continent traces them back to 14 ancestral groups and documents the extent of diversity within and among African populations. See page 1035.

DEPARTMENTS

- 983 This Week in *Science*
- 989 Editors' Choice
- 992 *Science* Staff
- 995 Random Samples
- 1092 New Products
- 1093 *Science* Careers

REVIEW

- 1029 Understanding the Warbug Effect: The Metabolic Requirements of Cell Proliferation
M. G. Vander Heiden et al.

BREVIA

- 1034 The SOS Response Controls Integron Recombination
É. Guerin et al.
Bacteria can mobilize antibiotic resistance under stressful conditions.

RESEARCH ARTICLE

- 1035 The Genetic Structure and History of Africans and African Americans
S. A. Tishkoff et al.
A genetic study illuminates population history, as well as the relationships among and the origin of major language families.

REPORTS

- 1044 Dispersion of the Excitations of Fractional Quantum Hall States
I. V. Kukushkin et al.
The dispersion of excitations in a buried two-dimensional electron system can now be probed.
>> *Perspective p. 1022*
- 1048 Real-Time Infrared Detection of Cyanide Flip on Silver-Alumina NO_x Removal Catalyst
F. Thibault-Starzyk et al.
Rapid initiation of a catalytic reaction through laser heating enables the spectroscopic detection of a key intermediate.
- 1051 Fabricating Genetically Engineered High-Power Lithium-Ion Batteries Using Multiple Virus Genes
Y. J. Lee et al.
A genetically modified virus is used to form an efficient cathodic battery material.
- 1055 Greater Transportation Energy and GHG Offsets from Bioelectricity Than Ethanol
J. E. Campbell et al.
Electric vehicles powered by electricity made from biofuels are more efficient than vehicles fueled by bioethanol.
>> *Policy Forum p. 1019*
- 1058 Exploration of Victoria Crater by the Mars Rover Opportunity
S. W. Squyres et al.
Water-induced alteration processes once acted on sedimentary rocks across a plain near the equator of Mars.

- 1061 Bone Assemblages Track Animal Community Structure over 40 Years in an African Savanna Ecosystem
D. Western and A. K. Behrensmeyer
Species abundances in African mammal bone assemblages show promise for reconstructing modern and ancient community structures.
- 1064 Regulators of PP2C Phosphatase Activity Function as Abscisic Acid Sensors
Y. Ma et al.
- 1068 Abscisic Acid Inhibits Type 2C Protein Phosphatases via the PYR/PYL Family of START Proteins
S.-Y. Park et al.
Links between two ancient multimember protein families signal responses to the plant hormone abscisic acid.
>> *News story p. 1012*
- 1071 Understanding the Spreading Patterns of Mobile Phone Viruses
P. Wang et al.
Current mobile phone usage prevents major mobile virus outbreaks, but conditions could arise leading to a phone epidemic.
>> *Perspective p. 1023*
- 1076 ATP-Citrate Lyase Links Cellular Metabolism to Histone Acetylation
K. E. Wellen et al.
Histone acetylation and gene expression in mammals are modulated by glycolytic metabolism.
>> *Perspective p. 1021*
- 1080 Phasic Firing in Dopaminergic Neurons Is Sufficient for Behavioral Conditioning
H.-C. Tsai et al.
High-frequency pulses in deep brain cells release dopamine and cause reward-related behavior in mice.
- 1084 The Human K-Complex Represents an Isolated Cortical Down-State
S. S. Cash et al.
A characteristic electroencephalogram pattern seen during sleep is accompanied by a steep decline in neural activity.
- 1087 Crystal Structure of the Nuclear Export Receptor CRM1 in Complex with Snurportin1 and RanGTP
T. Monecke et al.
The structure of an exportin complex shows how nuclear transport complexes differentially recognize cargo.

Germline P Granules Are Liquid Droplets That Localize by Controlled Dissolution/Condensation
C. P. Brangwynne et al.

Localization of RNA and protein-rich germ-cell granules occurs by controlled dissolution and condensation.
10.1126/science.1172046

Inhibition of Hedgehog Signaling Enhances Delivery of Chemotherapy in a Mouse Model of Pancreatic Cancer

K. P. Olive et al.

Pancreatic tumors are unresponsive to chemotherapy because their limited vasculature precludes efficient drug delivery.

10.1126/science.1171362

MicroRNA-92a Controls Angiogenesis and Functional Recovery of Ischemic Tissues in Mice
A. Bonauer et al.

Inhibition of a microRNA that represses blood vessel growth enhances the recovery of tissue damaged by an inadequate blood supply.

10.1126/science.1174381

The Signal Transduction Knowledge Environment

RESEARCH ARTICLE: Deciphering Signaling Outcomes from a System of Complex Networks

R. C. Hsueh et al.

Despite exposure to multiple ligands, a macrophage cell line exhibits a surprisingly limited number of responses.

RESEARCH ARTICLE: TRPM2 Functions as a Lysosomal Ca²⁺-Release Channel in β Cells

I. Lange et al.

TRPM2-mediated Ca²⁺ release from lysosomal stores contributes to pancreatic β cell death in response to oxidative stress.

PERSPECTIVE: Limb Development Takes a Measured Step Toward Systems Analysis

S. Mackem and M. Lewandoski

Gremlin links slow and fast signaling feedback loops, which contribute to robust regulation of mouse limb patterning.

PODCAST

E. Oancea and A. M. VanHook

TRPM1 is a cation channel found on vesicular membranes and associated with melanin content in melanocytes.

FORUM: Poster Award Winners from “Visualizing Immune System Complexity”

N. R. Gough

Three students are recognized for their work at an EMBO workshop held at the Centre d’Immunologie de Marseille-Luminy in France in January 2009.

E-LETTER: ACC Award

Science Signaling Editors

Naoki Sawada wins a Young Investigator Award from the American Academy of Cardiology for his *Science Signaling* Research Article.
