Münster

MAX-PLANCK-GESELLSCHAFT

The Max Planck Society announces Max Planck Research Group in the Area of Network Analysis in Biomedicine

As a result of the joint effort of the Max Planck Society, the Ministry for Innovation, Science, Research and Technology of the State of North Rhine-Westphalia and the Medical Faculty of the University of Münster, to foster stem cell research for the study of human degenerative disease, the Max Planck Institute for Molecular Biomedicine (www.mpi-muenster.mpg.de) has an opening for a Max Planck Research Group. The group leader position as well as modern laboratory space is guaranteed for five years (W2; equivalent to associate professor level), he or she is entitled to funding for a research group. The institute runs an International PhD Program (IMPRS) and has strong links to the University of Münster.

The Max Planck Institute with its network (such as the Lead Discovery Center and the Chemical Genomics Centre of the Max Planck Society located in nearby Dortmund), offers an ideal interdisciplinary research environment for computational biology scientists interested in developing molecular and metabolic in silico models for stem cells, normal and pathophysiological processes.

The Max Planck Society seeks to increase the number of women in those areas where they are underrepresented and therefore explicitly encourages women to apply. The Max Planck Society is also committed to employing more handicapped individuals and especially encourages them to apply.

Further information can be obtained through Hans Schöler, Director, Max Planck Institute for Molecular Biomedicine. Email: office@mpi-muenster.mpg.de

Please send your online application until June 20, 2010. Application requirements are detailed on www.mpi-muenster.mpg.de/career/openings/index.html

The selected candidates will be invited to Münster to participate in a symposium (August 5, 2010).

Science Careers is the stage that showcases your talent.

Visit our **ENHANCED WEBSITE!**

Showing your talent is our forte. Whether you're seeking a new job in academia or career advancement in your chosen field, **Science Careers** is your first stage toward a fulfilling future.

Your Future Awaits.

Improved Website Features:

- New design for easier navigation
- More relevant job search results
- Automated tools for a more effective search
