

“My real-time PCR system lets me stay **ampliflexible** with my high throughput workflows.”

Automation-ready, high-throughput qPCR that adapts to your workflow.

Bio-Rad's CFX384™ real-time PCR system adapts to your workflow, generating data and accelerating discoveries with the unparalleled performance and reliability you know and trust from Bio-Rad.

- Get results faster with the streamlined experiment setup and powerful data analysis tools
- Save samples and reagents with low sample volume and 4-target multiplex reactions; achieve optimal results with pre-developed assays
- Maximize your productivity with the CFX automation system for walk away, worry-free automated operation

Bring 20 years of our experience in PCR to your discovery. Visit www.bio-rad.com/ad/amplifamily or contact your Bio-Rad sales representative to learn more.

Research. Together.
