COVER

Adult sockeye salmon (weight ~2.5 kg; length ~60 cm) migrating to spawning grounds in the Adams River, British Columbia, Canada. Sockeye salmon populations in the Fraser River, British Columbia, are physiologically adapted to their specific upriver migration conditions. In a Report on page 109, Eliason *et al.* suggest that cardiac adaptations help protect one salmon population from cardiac collapse at high temperatures.

RESEARCH ARTICLES

- 60 **The World's Technological Capacity to Store, Communicate, and Compute Information**
M. Hilbert and P. López
An inventory of the world's technological capacity from 1986 to 2007 reveals the evolution from analog to digital technologies.
- 65 **Chronic Mucocutaneous Candidiasis in Humans with Inborn Errors of Interleukin-17 Immunity**
A. Puel et al.
Chronic yeast infections in the absence of other infections result from genetic deficiencies in proinflammatory host responses.
>> *Perspective p. 47*
- REPORTS**
- 69 **PAMELA Measurements of Cosmic-Ray Proton and Helium Spectra**
O. Adriani et al.
Satellite measurements challenge the current understanding of cosmic-ray acceleration and propagation in our Galaxy.
- 72 **Spontaneous Ferroelectric Order in a Bent-Core Smectic Liquid Crystal of Fluid Orthorhombic Layers**
R. A. Reddy et al.
The ferroelectric properties of bent-core liquid crystalline molecules emerge from ordering within the smectic layers.
- 77 **Heavily Doped Semiconductor Nanocrystal Quantum Dots**
D. Mocatta et al.
Impurities can be added into semiconductor nanoparticles to control their electronic and optical properties.
>> *Perspective p. 48; Science Podcast*
- 81 **Electrochemically Mediated Atom Transfer Radical Polymerization**
A. J. D. Magenau et al.
The structure of a polymer can be fine-tuned by rapidly starting and stopping its synthesis.
- 84 **Thermochronometry Reveals Headward Propagation of Erosion in an Alpine Landscape**
D. L. Shuster et al.
Glacial troughs in New Zealand mountains developed by propagation of erosion up valleys.

- 88 **Microtomography of Partially Molten Rocks: Three-Dimensional Melt Distribution in Mantle Peridotite**
W. Zhu et al.
As mantle rocks melt, an interconnected network of liquid drives the ascent of magma to the sea floor.
- 91 **Selective Inhibition of a Regulatory Subunit of Protein Phosphatase 1 Restores Proteostasis**
P. Tsaytler et al.
Guanabenz, a small-molecule inhibitor, protects cells from lethal accrual of misfolded proteins in the endoplasmic reticulum.
>> *Perspective p. 44*
- 94 **Directional Switching of the Kinesin Cin8 Through Motor Coupling**
J. Roostal et al.
A molecular motor switches direction upon interacting with individual microtubules or antiparallel microtubules.
- 99 **The C-Terminal Domain of RNA Polymerase II Is Modified by Site-Specific Methylation**
R. J. Sims III et al.
The expression of small nuclear RNAs and small nucleolar RNAs is regulated by modification at a single arginine residue.
- 103 **Perception of UV-B by the *Arabidopsis* UVR8 Protein**
L. Rizzini et al.
A plant ultraviolet-B photoreceptor uses a tryptophan-based chromophore.
- 106 **Bacteria-Phage Antagonistic Coevolution in Soil**
P. Gómez and A. Buckling
Microcosm experiments show endless cycles of host and parasite adaptation in near natural populations.
- 109 **Differences in Thermal Tolerance Among Sockeye Salmon Populations**
E. J. Eliason et al.
Environmental conditions encountered during migration shape cardiorespiratory physiology in sockeye salmon.
