COVER

The right forearm and hand (hand skeleton ~12.3 centimeters long) of *Australopithecus sediba*, specimen Malapa Hominin 2. Papers in this issue present a detailed look at the hands, feet, pelvis, brain endocast, and age of this hominid, which lived 2 million years ago, near the emergence of our genus, *Homo*. See the series of Reports starting on p. 1402, News Focus package p. 1370, and www.sciencemag.org/extra/sediba.

DEPARTMENTS

- 1357 This Week in *Science*
- 1360 Editors' Choice
- 1362 *Science* Staff
- 1468 Gordon Research Conferences
- 1479 New Products
- 1480 *Science* Careers

BREVIA

- 1401 A Gene for an Extended Phenotype
K. Hoover et al.
An insect virus gene controls the behavior of the dying host to increase dispersion of the virus.

REPORTS

- 1402 The Endocast of MH1, *Australopithecus sediba*
K. J. Carlson et al.
- 1407 A Partial Pelvis of *Australopithecus sediba*
J. M. Kibii et al.
- 1411 *Australopithecus sediba* Hand Demonstrates Mosaic Evolution of Locomotor and Manipulative Abilities
T. L. Kivell et al.
- 1417 The Foot and Ankle of *Australopithecus sediba*
B. Zipfel et al.
- 1421 *Australopithecus sediba* at 1.977 Ma and Implications for the Origins of the Genus *Homo*
R. Pickering et al.
Details of the hands, feet, pelvis, and brain of *Australopithecus sediba* show both primitive features and one derived toward those of *Homo*.
>> News stories pp. 1370 and 1373; Science Podcast
- 1423 A Simple, Multidimensional Approach to High-Throughput Discovery of Catalytic Reactions
D. W. Robbins and J. F. Hartwig
A screening technique based on simple mass spectrometry measurements uncovers catalysts for organic coupling reactions.
>> Perspective p. 1387
- 1427 Ice Flow of the Antarctic Ice Sheet
E. Rignot et al.
A high-resolution map of ice motion in Antarctica shows the details of ice movement in a warming climate.
>> Perspective p. 1386
- 1430 Aeroelastic Flutter Produces Hummingbird Feather Songs
C. J. Clark et al.
Hummingbirds produce diverse courtship sounds by using resonantly fluttering tail feathers.
- 1434 Flight at Low Ambient Humidity Increases Protein Catabolism in Migratory Birds
A. R. Gerson and C. G. Guglielmo
Dry conditions during endurance flight increase rates of lean mass loss and protein catabolism in Swainson's thrushes.

- 1436 Generation of Spatial Patterns Through Cell Polarity Switching
S. Robinson et al.
A few simple rules are sufficient to keep neighboring stomata at a safe distance from one another.
- 1440 X-ROS Signaling: Rapid Mechano-Chemo Transduction in Heart
B. L. Prosser et al.
Reactive oxygen species produced by NADPH oxidase link mechanical stretching to calcium signaling in mammalian myocytes.
>> Perspective p. 1388
- 1445 Chromosome Organization by a Nucleoid-Associated Protein in Live Bacteria
W. Wang et al.
Super-resolution imaging in live *Escherichia coli* reveals protein clusters that sequester DNA loci and organize the chromosome.
- 1449 Ribosome Assembly Factors Prevent Premature Translation Initiation by 40S Assembly Intermediates
B. S. Strunk et al.
Ribosome assembly factors block multiple steps in translation initiation.
- 1453 Mutations in *CIC* and *FUBP1* Contribute to Human Oligodendroglioma
C. Bettegowda et al.
A gene originally studied for its role in fruit fly embryogenesis is implicated in the growth of a common human brain tumor.
- 1456 Synaptic Pruning by Microglia Is Necessary for Normal Brain Development
R. C. Paolicelli et al.
A good brain needs a good vacuum cleaner.
>> Perspective p. 1391
- 1458 Light-Induced Structural and Functional Plasticity in *Drosophila* Larval Visual System
Q. Yuan et al.
Postsynaptic plasticity participates in the adaptation of a sensory circuit to the environment.
- 1462 HCN2 Ion Channels Play a Central Role in Inflammatory and Neuropathic Pain
E. C. Emery et al.
Action potential firing, initiated by HCN2 ion channels, is the basic mechanism underlying neuropathic pain.

SCIENCE SIGNALING

www.sciencesignaling.org

The Signal Transduction Knowledge Environment

6 September issue: <http://scim.ag/ss090611>

EDITORIAL GUIDE: Focus Issue—Series on Computational and Systems Biology

N. R. Gough

The month of September includes research, teaching materials, and resources that exemplify themes in computational and systems biology.

RESEARCH RESOURCE: A Directed Protein Interaction Network for Investigating Intracellular Signal Transduction

A. Vinayagam et al.

Effective prediction of the direction of signal flow in an interaction network enables modeling of signaling dynamics and identification of regulatory proteins.

MEETING REPORT: Crowdsourcing Network Inference—The DREAM Predictive Signaling Network Challenge

R. J. Prill et al.

By aggregating the efforts of the research community, comprehensive and accurate inference of signaling networks may become achievable.

RESEARCH ARTICLE: Small Molecule–Mediated Activation of the Integrin CD11b/CD18 Reduces Inflammatory Disease

D. Maignel et al.

PODCAST

V. Gupta and A. M. VanHook

Activating integrin signaling may be an effective strategy for developing therapeutics to reduce leukocyte recruitment during inflammation.

SCIENCE TRANSLATIONAL MEDICINE

www.sciencetranslationalmedicine.org

Integrating Medicine and Science

7 September issue: <http://scim.ag/stm090711>

FOCUS: Imaging the Infected Heart

A. Alavi et al.

This Focus summarizes current and prospective roles of modern functional imaging techniques for detecting infection in general and endocarditis in particular.

PERSPECTIVE: Hidden Immunotherapy Targets Challenge Dogma

S. Ferrone

Intracellular tumor antigen-specific monoclonal antibodies inhibit tumor growth and metastasis and prolong survival of tumor-bearing mice.

RESEARCH ARTICLE: Targeting Intracellular Oncoproteins with Antibody Therapy or Vaccination

K. Guo et al.

Antibody therapy can target intracellular proteins.

RESEARCH ARTICLE: Activation of ERBB2 Signaling Causes Resistance to the EGFR-Directed Therapeutic Antibody Cetuximab

K. Yonesaka et al.

Several cancers become resistant to cetuximab by activating a bypass signaling pathway and preventing cetuximab inhibition of ERK1/2-stimulated growth.

FOCUS: Getting to the Root of Hydrocephalus

J. P. McAllister

The blood-borne lipid lysophosphatidic acid and its receptor contribute to fetal-onset hydrocephalus, a severe neurological disorder of newborns.

RESEARCH ARTICLE: Lysophosphatidic Acid Signaling May Initiate Fetal Hydrocephalus

Y. C. Yung et al.

Blockade of lysophosphatidic acid (LPA) signaling provides a new strategy for treating fetal hydrocephalus.

PODCAST

J. Chun and O. Smith

A conversation with Jerold Chun about identification of a lipid in blood that may trigger hydrocephalus in the fetus.

SCIENCE CAREERS

www.sciencereers.org/career_magazine

Free Career Resources for Scientists

Seeking Work in the Social Net

C. Mintz

Social media Web sites allow job seekers to present a fuller image of themselves and to interact directly with potential employers.
