COVER

Cooling pool containing a plutonium-uranium mixed-oxide fuel rod at Fukushima Dai-ichi nuclear power station, Japan, in August 2010. A tsunami on 11 March 2011 damaged three of the station's reactors, prompting reassessment of Japan's reliance on nuclear power and its approach to disaster preparedness. See the Review by Burns *et al.* (page 1184), as well as the related Editorial (page 1147) and News story (page 1164).

BREVIA

- 1194 **Fluorescence Imaging of Cellular Metabolites with RNA**
J. S. Paige et al.
Cellular metabolites are detected within living cells by fluorescent RNA-based ligand-binding sensors.

RESEARCH ARTICLE

- 1195 **Lin28b Reprograms Adult Bone Marrow Hematopoietic Progenitors to Mediate Fetal-Like Lymphopoiesis**
J. Yuan et al.
The RNA binding protein Lin28 drives fetal modes of immune cell development.

REPORTS

- 1201 **Designing Responsive Buckled Surfaces by Halftone Gel Lithography**
J. Kim et al.
Halftone lithography can pattern two-dimensional swellable gels to produce complex three-dimensional shapes.
>> *Perspective p. 1179*
- 1205 **Coking- and Sintering-Resistant Palladium Catalysts Achieved Through Atomic Layer Deposition**
J. Lu et al.
Uniform oxide coating on palladium nanoparticles prevents carbon accumulation and particle growth during chemical reactions.
- 1209 **Isolated Metal Atom Geometries as a Strategy for Selective Heterogeneous Hydrogenations**
G. Kyriakou et al.
Palladium atoms adsorbed on a copper surface activate hydrogen adsorption for subsequent hydrogenation reactions.
- 1212 **An Impactor Origin for Lunar Magnetic Anomalies**
M. A. Wieczorek et al.
Most lunar magnetic anomalies can be attributed to magnetic materials in the projectile that formed the largest lunar basin.
>> *Perspective p. 1176; Science Podcast*

- 1215 **Reconstruction of *Microraptor* and the Evolution of Iridescent Plumage**
Q. Li et al.
Iridescence in the feathers of a feathered dinosaur suggests an early role for feathers in ornamental display and signaling.
- 1219 **Intensifying Weathering and Land Use in Iron Age Central Africa**
G. Bayon et al.
Savannas abruptly replaced rainforests around 3000 years ago on account of both climate and human land-use changes.
>> *Perspective p. 1180*
- 1222 **A Bruce Effect in Wild Geladas**
E. K. Roberts et al.
Long-term field studies show female monkeys improve their fitness by terminating their pregnancies when a new male becomes dominant.
- 1225 **Molecular Determinants of Scouting Behavior in Honey Bees**
Z. S. Liang et al.
The molecular underpinnings of novelty-seeking in honey bees are similar to those of vertebrates.
- 1228 **Atomic View of a Toxic Amyloid Small Oligomer**
A. Laganowsky et al.
Cylindrin from the amyloid-forming protein α B crystallin represents an amyloid oligomer.
- 1232 **Triggering a Cell Shape Change by Exploiting Preexisting Actomyosin Contractions**
M. Roh-Johnson et al.
Morphogenesis in developing worms and flies harnesses ongoing cortical motility.
>> *Perspective p. 1181*
- 1235 **Nucleosomes Suppress Spontaneous Mutations Base-Specifically in Eukaryotes**
X. Chen et al.
The placement of nucleosomes, which help to package DNA, affects mutation accumulation across eukaryotic lineages.
- 1238 **Unique Processing During a Period of High Excitation/Inhibition Balance in Adult-Born Neurons**
A. Marin-Burgin et al.
A specific set of functional properties can be attributed to immature granule cells developing in the hippocampus.
>> *Perspective p. 1175*
