COVER
The theme of the 2013 AAAS Annual Meeting, 14 to 18 February in Boston, Massachusetts, is The Beauty and Benefits of Science. This theme highlights the “unreasonable effectiveness” of the scientific enterprise in creating economic growth, solving societal problems, and satisfying the essential human drive to understand the world in which we live. The preliminary program begins on page 688.

REPORTS
634  A Quantum Delayed-Choice Experiment
A. Peruzzo et al.
>> Science Podcast
637  Entanglement-Enabled Delayed-Choice Experiment
F. Kaiser et al.
Quantum entanglement is used to probe the nature of the photon.
>> Perspective p. 621
640  Quantum Entanglement of High Angular Momenta
R. Fickler et al.
A method to entangle photons with very-high–orbital angular momentum quantum numbers advances quantum information science.
643  Efficient Hybrid Solar Cells Based on Meso-Superstructured Organometal Halide Perovskites
M. M. Lee et al.
Mesostructured alumina acts as an insulating scaffold for the assembly of very thin films of n- and p-type semiconductors.
>> Perspective p. 625
647  Photoinduced Ullmann C–N Coupling: Demonstrating the Viability of a Radical Pathway
S. E. Creutz et al.
A century-old carbon–nitrogen coupling method can be accelerated by light.
651  The Absolute Chronology and Thermal Processing of Solids in the Solar Protoplanetary Disk
J. N. Connelly et al.
Isotopic dating implies that, contrary to previous results, two types of primitive solar system solids formed coevally.
654  Tug-of-War in Motor Protein Ensembles Revealed with a Programmable DNA Origami Scaffold
N. D. Derr et al.
Two microtubule motors attached to the same cargo cooperate or compete, depending on relative directionality.
>> Perspective p. 626
655  Chloroplast Biogenesis Is Regulated by Direct Action of the Ubiquitin-Proteasome System
Q. Ling et al.
Protein degradation helps to coordinate the growth of chloroplasts with that of the whole plant.
>> Perspective p. 622
659  Tricking the Guard: Exploiting Plant Defense for Disease Susceptibility
J. Lorang et al.
Cochliobolus victoriae, a necrotrophic fungal pathogen with devastating effects on oat crops reveals its strategies.
662  Asymmetric Division of Drosophila Male Germline Stem Cell Shows Asymmetric Histone Distribution
V. Tran et al.
The allocation of newly made histones to the daughter cell may explain how stem cells retain their epigenetic footprint.
>> Perspective p. 617; Science Podcast
666  Synchronizing Nuclear Import of Ribosomal Proteins with Ribosome Assembly
D. Kressler et al.
The transport adaptor symportin mediates stoichiometric import of a pair of ribosomal proteins.
669  Some Consequences of Having Too Little
A. K. Shah et al.
Being poor means that resources such as time and money are scarce, and this changes how people who are poor behave.
>> Perspective p. 617; Science Podcast
