SMART FILM

Redefining Everything™

Bluestone Global Tech (BGT) is the first company to provide high quality, large-area graphene films—over 50”.

BGT is using this breakthrough material to enhance the performance of everyday technologies including LED lighting, flexible electronics, batteries and other nanoelectronics.

What innovation is possible with atomic monolayer graphene?
Your search for graphene films stops here.
Order your superior quality graphene film at www.bluestonegt.com.

GRATOM-A™

Large-area graphene films up to 50”

GRATOM-R™

Low sheet resistance and high optical transmittance graphene film

GRATOM-M™

High carrier mobility monolayer graphene film

GRATOM-S™

Isolated monolayer graphene single crystals with large domain size
