needs
women*

Deborah S. Jin, physicist and 2013 Laureate, is a Fellow of JILA and professor adjoint at the University of Colorado, USA. She is the first to have cooled down molecules to such a degree that she could observe chemical reactions in slow motion. This new technique will benefit research in the fields of energy and health.

Throughout the world, exceptional women are at the heart of major scientific advances. For 15 years, they have received our support to continue to move science forward and to inspire future generations.
