**832** Planted forest health: The need for a global strategy *M. J. Wingfield et al.*

**ON THE COVER**

Ecologist Roman Dial goes to great lengths to perform an ecological survey of mountain ash trees (*Eucalyptus regnans*) in an Australian forest.

Researchers making similar efforts globally help us understand and monitor the health of forests as they face increasing challenges in our changing world. See page 800. *Photo: Bill Hatcher/National Geographic Creative*
