ON THE COVER

Reconstruction of a 10th-century Norse church in Greenland. This replica, made of timber and turf, was built in 2000. Recent archaeological excavations and analyses in Greenland

and elsewhere suggest a new solution to the medieval mystery of why the Norse colony in Greenland failed after 500 years. See page 696. For more on the process behind the cover image, see <http://scim.ag/2foZdEL>. Photo: Bill Douthitt
