Modifying microtubules

15 DECEMBER 2017 • VOLUME 358 • ISSUE 6369

FEATURES

1370 NOT SO FAST

We can't even agree on what autonomous vehicles are, much less how they will affect our lives
By J. Mervis

1375 A MATTER OF TRUST

Researchers are studying why many consumers are apprehensive about autonomous vehicles, and how to put them at ease
By M. Hutson

ON THE COVER

Artistic rendering of a driverless car in operation. Automotive and technology companies say that we are well on the road to deploying

autonomous vehicles. But the trip could be bumpy, given consumer apprehension about relinquishing control and uncertainty over whether driverless cars will usher in a new age of safer, greener, and more convenient transportation—or simply add to existing problems. See pages 1370 and 1375.
