How a channel senses calcium

12 JANUARY 2018 • VOLUME 359 • ISSUE 6372

INTRODUCTION

146 After 200 years, *Frankenstein* is still essential reading for scientists
By K. Kupferschmidt

FEATURES

148 HOW A HORROR STORY HAUNTS SCIENCE

The novel offers grist for psychologists and science historians, ammunition for technophobes, and even inspiration for researchers
By J. Cohen

151 CREATING A MODERN MONSTER

A toolbox for Frankensteins of the 21st century
By D. Shultz and A. Arranz

152 TAMING THE MONSTERS OF TOMORROW

A small group of researchers is studying how science could destroy the world—and how to stop that from happening
By K. Kupferschmidt

154 A GLOSSARY OF FRANKENWORDS

Mary Shelley's story provided the perfect prefix to nickname any unusual creation
By J. Cohen

► EDITORIAL P. 137; BOOKS ET AL. P. 168; LETTERS P. 170; VIDEO

ON THE COVER

The cover illustration reimagines the monster first conjured in Mary Shelley's 1818 novel. Two centuries later, the story of how

the fictional Dr. Frankenstein built a creature from scavenged body parts and unleashed it on the world has lost none of its power to unsettle, and Frankenstein has become a byword for scientific overreach. See pages 137 and 146. *Illustration: Craig & Karl*

INSIGHTS

PERSPECTIVES

156 DETECTING THE BUILDING BLOCKS OF AROMATICS

Detection of benzonitrile in an interstellar cloud helps to constrain interstellar chemistry
By C. Joblin and J. Cernicharo

► REPORT P. 202

157 IMPROBABLE BIG BIRDS

Darwin's finches prove a mechanism for the rapid formation of new species
By C. E. Wagner

► REPORT P. 224

159 MALARIA PARASITE EVOLUTION IN A TEST TUBE

Experimental evolution studies reveal drug targets and resistance mechanisms
By J. M. Carlton

► RESEARCH ARTICLE P. 191

160 TRPM CHANNELS COME INTO FOCUS

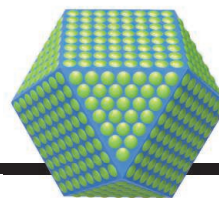

The structures of TRPM channels help to explain how they can sense intracellular calcium
By C. Bae et al.

► REPORTS PP. 228 & 237

162 COHERENT EXCITATIONS REVEALED AND CALCULATED

Neutron scattering and theoretical studies reveal wavelike electron states in CePd₃
By A. Georges

► RESEARCH ARTICLE P. 186

163 SILENCING STEMNESS IN T CELL DIFFERENTIATION

Epigenetic repression is required for the generation of CD8⁺ effector T cells

By *A. N. Henning et al.*

► RESEARCH ARTICLE P. 177

POLICY FORUM

165 GLOBAL SCIENCE FOR CITY POLICY

It is time for a global reform of science advice to cities *By M. Acuto*

RESEARCH

IN BRIEF

172 From *Science* and other journals

REVIEW

175 MEDICINE

Gene therapy comes of age *C. E. Dunbar et al.*

REVIEW SUMMARY; FOR FULL TEXT:

dx.doi.org/10.1126/science.aan4672

RESEARCH ARTICLES

176 PROTEIN MODIFICATION

Fatty acyl recognition and transfer by an integral membrane *S*-acyltransferase

M. S. Rana et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:

dx.doi.org/10.1126/science.aao6326

177 IMMUNOLOGY

The epigenetic control of stemness in CD8⁺ T cell fate commitment *L. Pace et al.*

► PERSPECTIVE P. 163

186 SOLID-STATE PHYSICS

Coherent band excitations in CePd₃: A comparison of neutron scattering and ab initio theory *E. A. Goremychkin et al.*

► PERSPECTIVE P. 162

191 MALARIAL GENOMICS

Mapping the malaria parasite druggable genome by using in vitro evolution and chemogenomics *A. N. Cowell et al.*

► PERSPECTIVE P. 159

REPORTS

199 MARTIAN GEOLOGY

Exposed subsurface ice sheets in the Martian mid-latitudes *C. M. Dundas et al.*

202 ASTROCHEMISTRY

Detection of the aromatic molecule benzonitrile (*c*-C₆H₅CN) in the interstellar medium *B. A. McGuire et al.*

► PERSPECTIVE P. 156

206 POROUS MATERIALS

Ordered macro-microporous metal-organic framework single crystals *K. Shen et al.*

210 INFECTION

Antagonism toward the intestinal microbiota and its effect on *Vibrio cholerae* virulence *W. Zhao et al.*

NEUROSCIENCE

213 Spatial representations of self and other in the hippocampus *T. Danjo et al.*

218 Social place-cells in the bat hippocampus *D. B. Omer et al.*

224 HYBRID SPECIATION

Rapid hybrid speciation in Darwin's finches *S. Lamichhaney et al.*

► PERSPECTIVE P. 157

228 STRUCTURAL BIOLOGY

Structure of the human TRPM4 ion channel in a lipid nanodisc *H. E. Autzen et al.*

► PERSPECTIVE P. 160; REPORT P. 237

232 GUT IMMUNITY

CX3CR1⁺ mononuclear phagocytes control immunity to intestinal fungi *I. Leonardi et al.*

237 STRUCTURAL BIOLOGY

Structure of the cold- and menthol-sensing ion channel TRPM8 *Y. Yin et al.*

► PERSPECTIVE P. 160; REPORT P. 228

DEPARTMENTS

137 EDITORIAL

Frankenstein lives on *By Henk van den Belt*

► FRANKENSTEIN SECTION P. 146

246 WORKING LIFE

My second life as a teacher *By William H. Waller*
