1174 The pill exchange
1175 The loyal opposition

1160 SEAFLOOR FIBER OPTIC CABLES CAN LISTEN FOR EARTHQUAKES
Method offers a low-cost way to fill seismic detection gaps
By E. Hand

1161 STRICTER CHINESE STUDENT VISAS RAISE ALARM
Entry permission cut to 1 year for graduate students in some STEM fields
By J. Mervis

1176 THE SUNSHINE STATE’S DARK CLOUD
New efforts aim to curb Florida’s startlingly high new infection rate
By J. Cohen

ON THE COVER

Yusuf Adamu, a 12-year-old boy with an advanced case of AIDS, gets an x-ray at Asokoro District Hospital in Abuja, Nigeria. Although the world is getting closer to its goal of “ending AIDS,” HIV still wreaks havoc in some places. Powerful antiretrovirals can thwart transmission and extend life span, but many infected people do not have the means to obtain these drugs, owing to poverty and other socioeconomic factors.

INSIGHTS

1180 A TOOL FOR FINDING RARE MARINE SPECIES
Environmental DNA analysis shows promise for studying rare and elusive marine species
By E. K. Pikitch

1182 CRYSTALLIZING A MEMORY
Researchers identify and modulate synaptic correlates of a memory engram
By S. Ramirez

1184 SCALING OF HUMAN BRAIN SIZE
Higher cognitive regions are preferentially expanded in individuals with larger brains
By D. C. Van Essen

1185 ANIMALS FEEL SAFER FROM HUMANS IN THE DARK
Mammals shift their activities to twilight and night hours in response to human disturbance
By A. Benítez-López

1186 FACING YOUR FEARS
Activation of remote fear memory promotes fear attenuation
By P. W. Frankland and S. A. Josselyn
