of our weekly readers are Ph.D.s

Artificial Intelligence (AI) is impacting science in new and exciting ways as scientists are using it to better understand society to find solutions to problems across diverse disciplines. This feature will give an overview of AI, and explore the hotspots/centers of excellence and applications for AI. Typical career paths for those working in AI will be explored as well as the opportunities that exist for careers in AI.

Your organization can brand itself as a leader in AI by raising your visibility alongside relevant content while attracting potential candidates. Contact us for further details.

FOR RECRUITMENT IN SCIENCE, THERE'S ONLY ONE SCIENCE.

GEORGIA CANCER CENTER

Basic and Translational Cancer Research Scientists

Georgia Cancer Center at Augusta University in Augusta, GA is undergoing an unprecedented expansion in its basic, translational and cancer prevention programs as part of an initiative to achieve designation as an NCI Cancer Center. Following the successful completion of Phase I of this expansion, we invite applications for positions at **Assistant, Associate, and Full Professor** levels from interested individuals having expertise in **tumor immunology, tumor angiogenesis, cancer genetics and genomics, chaperone biology, cancer metabolism and experimental therapeutics.**

Applicants must have active extramural research funding (preferably from NCI) and a strong track record of independent research. Ideal candidates will have conducted research in an NCI-designated Cancer Center. Successful applicants will join one of our three collaborative programs that work closely with clinical research oncologists to promote translational research.

A competitive salary and start-up package will be provided, commensurate with experience and academic qualifications. A summary of research interests, curriculum vitae, and names of three references should be sent to **Khensley@augusta.edu**.

Massachusetts Institute of Technology

Department of Earth, Atmospheric, and Planetary Sciences

Faculty Position in Geophysics and Geochemistry

The Department of Earth, Atmospheric, and Planetary Sciences at the Massachusetts Institute of Technology (MIT), Cambridge, MA 02139, invites qualified candidates to apply for a tenure-track faculty position. The search is in the broad area of geophysics and geochemistry encompassing the Earth and other planetary bodies in the solar system. We seek candidates who use theory, observation, and/or experimentation and particularly encourage applicants whose work crosses traditional disciplinary boundaries. Candidates should have the potential for innovation and leadership in research and a commitment to teaching at the undergraduate and graduate levels.

Applicants must hold a Ph.D. in geoscience or related field by the start of employment. Our intent is to hire at the assistant professor level, but more senior appointments may also be considered. A complete application must include a cover letter, curriculum vitae, one- to two-page descriptions each of research and teaching plans, and three letters of recommendation. We request that in their cover letter, applicants explicitly commit to our department's code of conduct: <https://eapsweb.mit.edu/about/code-conduct>

Applications are being accepted at Academic Jobs Online: <https://academicjobsonline.org/ajo/jobs/11380>

To receive full consideration, complete applications must be received by November 1, 2018.

Search Contact: Ms. Karen Fosher, HR Administrator, EAPS, 54-924, Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, MA 02139-4307, email: kfosher@mit.edu

MIT is an equal employment opportunity employer. All qualified applicants will receive consideration for employment and will not be discriminated against on the basis of race, color, sex, sexual orientation, gender identity, religion, disability, age, genetic information, veteran status, ancestry, or national or ethnic origin.
