662 WORKING LIFE

When the trail gets steep
By Leela Dilkes-Hoffman

ON THE COVER

For thousands of years, Andean farmers have cultivated colorful landraces of domesticated potatoes, such as lioness, tunica, and tarmeña shown in this arrangement. Landraces and wild

species hold genetic diversity that could be key to developing new potato varieties, which are needed to help farmers adapt to climate change and other challenges. See page 574. Photo: Gustavo Ramirez
