

ZGC Life Science Park

National Institute of Biological Sciences, Beijing

Chinese Institute for Brain Research, Beijing

The Lab for Genetron Health

Founded in 2000, ZGC Life Science Park located Changping District, Beijing, China, is an important part of ZGC National Independent Innovation Demonstration Zone, and is a hi-tech science park engaged in life sciences, biotechnology and biomedical research.

The park covers an area of 2.5 square kilometers and have over 500 enterprises in life science field, including Novo Nordisk, BeiGene, Mindray, etc., and has attracted topnotch scientists such as Wang Xiaodong, Shi Yigong, He fuchu, Shao Feng, etc. Innovation elements such as projects, talents and enterprises are now highly concentrated. The average R&D ratio of the park is 7.19% which is higher than the national average. In fields like biopharmaceuticals, gene testing and diagnostic reagents, a batch of breakthrough technologies and achievements have been produced, which make ZGC Life Science Park the R&D center with global influence, and welcomes scientists, entrepreneurs and investors across the world.
