Please join us in congratulating the recipients of the 2019 Cozzarelli Prize!

Awarded annually to six PNAS articles, one in each of the National Academy of Sciences’ six broadly defined scientific classes, this year’s winners represent exceptional scientific achievement, originality, and innovation in their fields.

The 2019 Cozzarelli Prize–winning papers are:

**PHYSICAL AND MATHEMATICAL SCIENCES**

*The end of ice I*, Daniel R. Moberg, Daniel Becker, Christoph W. Dierking, Florian Zurheide, Bernhard Bandow, Udo Buck, Arpa Hudait, Valeria Molinero, Francesco Paesani, and Thomas Zeuch

**BIOLOGICAL SCIENCES**

*Mosaic origin of the eukaryotic kinetochore*, Eelco C. Tromer, Jolien J. E. van Hooff, Geert J. P. L. Kops, and Berend Snel

**ENGINEERING AND APPLIED SCIENCES**

*Mechanics unlocks the morphogenetic puzzle of interlocking bivalved shells*, Derek E. Moulton, Alain Goriely, and Régis Chirat

**BIOMEDICAL SCIENCES**

**BEHAVIORAL AND SOCIAL SCIENCES**

*Bioarchaeology of Neolithic Çatalhöyük reveals fundamental transitions in health, mobility, and lifestyle in early farmers*, Clark Spencer Larsen, Christopher J. Knüsel, Scott D. Haddow, Marin A. Pilloud, Marco Milella, Joshua W. Sadvari, Jessica Pearson, Christopher B. Ruff, Evan M. Garofalo, Emmy Bocaegh, Barbara J. Betz, Irene Dori, and Bonnie Glencross

**APPLIED BIOLOGICAL, AGRICULTURAL, AND ENVIRONMENTAL SCIENCES**

*Economics of the disintegration of the Greenland ice sheet*, William Nordhaus

We are embedded in a variety of ecosystems, including the environments that we inhabit and the many social systems in which we live and work. Finding ways of maintaining the stable balance of these ecosystems in the face of rapidly changing circumstances is critical for our advancement. Drawing on a multitude of scientific perspectives, this Annual Meeting seeks to feature diverse ways of understanding the complexities and dynamics of biological, physical, social, and economic systems across scales, as well as strengthening and activating new connections to address underlying problems in various spheres.

Join us in Phoenix!

SESSION PROPOSAL DEADLINE EXTENDED!
Session proposals for the 2021 AAAS Annual Meeting are now being accepted through July 14, 2020.
Share Your Robotics Research with the World.

As a multidisciplinary online-only journal, Science Robotics publishes original, peer-reviewed, research articles that advance the field of robotics. The journal provides a central forum for communication of new ideas, general principles, and original developments in research and applications of robotics for all environments.

Submit your research today. Learn more at: ScienceRobotics.org

Transforming the Future of Robotics in Research!
Science Webinars help you keep pace with emerging scientific fields!

Stay informed about scientific breakthroughs and discoveries.
Gain insights into current research from top scientists.
Take the opportunity to ask questions during live broadcasts.
Get alerts about upcoming free webinars.

Biomedical Engineering (BME) Frontiers is a Science Partner Journal distributed by the American Association for the Advancement of Science (AAAS) in collaboration with the Suzhou Institute of Biomedical Engineering and Technology, Chinese Academy of Sciences (SIBET CAS). BME Frontiers aims to serve as an effective platform for the multidisciplinary community of biomedical engineering. The journal will publish breakthrough research in the fields of pathogenic mechanisms as well as disease prevention, diagnosis, treatment, and assessment.

The Science Partner Journals (SPJ) program was established by the American Association for the Advancement of Science (AAAS), the nonprofit publisher of the Science family of journals. The SPJ program features high-quality, online-only, open access publications produced in collaboration with international research institutions, foundations, funders and societies. Through these collaborations, AAAS expands its efforts to communicate science broadly and for the benefit of all people by providing top-tier international research organizations with the technology, visibility and publishing expertise that AAAS is uniquely positioned to offer as the world's largest general science membership society.

Submit your research to Biomedical Engineering Frontiers today!

ARTICLE PROCESSING CHARGES WAIVED UNTIL 2021
What do you and Thomas Edison have in common?

AAAS.

By investing in AAAS you join Thomas Edison and the many distinguished individuals whose vision led to the creation of AAAS and our world-renowned journal, Science, more than 150 years ago.

Like Edison, you can create a legacy that will last well into the future through planned giving to AAAS. By making AAAS a beneficiary of your will, trust, retirement plan, or life insurance policy, you make a strong investment in our ability to advance science in the service of society for years to come.

To discuss your legacy planning, contact Juli Staiano, Chief Philanthropy Officer, at (202) 326-6636, or jstaiano@aaas.org, or visit aaas.org/1848society for more information.

“I feel great knowing that I will leave behind a legacy that will be channeled through the AAAS. It also means a lot to me to be able to honor my late parents, too.”

—Peter Eckel
Member, 1848 Society and AAAS Member since 1988
ProMab Biotechnologies commits to stay at the forefront of CAR-T technologies by providing an all-inclusive pre-clinical research program for CAR-T development. Our CAR-T platform utilizes lentivirus as it has become widely used as a vector to deliver specific genes of interest and to compliment gene and cell therapy applications.

Our standardized and highly optimized platform enables ProMab to produce recombinant lentivirus with many benefits:

- Custom vector engineering from gene synthesis to plasmid production
- High titer: 10^8 to 10^10 particles/ml
- Fast turnaround time: 2 to 3 weeks
- Variety of analytical options
- Ready to use CAR-T lentivirus
- Downstream to CAR-T or stable cell line development services

All products are for research only
