ON THE COVER

Famines related to droughts can take a heavy toll. In 2011, dry conditions exacerbated hardships for some 430,000 refugees fleeing violence in Somalia. Here, Somali refugees seek aid in

a camp near Dadaab, Kenya. Scientists are using new monitoring tools to identify regions at risk of famine and help ward off hunger before it is too late. See page 254. Photo: *Jacky Ghossein/The Sydney Morning Herald/Fairfax Media via Getty Images*
