159

As COVID-19 cases climbed in May, Stockholm remained busy—and largely maskless.

## NEWS

### IN BRIEF

**150** News at a glance

### IN DEPTH

**153** **Astronomy is—and has—a climate problem**

Big carbon footprints and rising vulnerabilities push astronomers to take action *By D. Clery*

**154** **A call to test new vaccines head to head, in monkeys**

Proposed comparison study could clarify safety and which vaccines work best *By J. Cohen*

**156** **With to-do list checked off, U.S. physicists ask, ‘What’s next?’**

Giant neutrino experiment is only sure thing for the field *By A. Cho*

**157** **Newly found viruses suggest rubella originated in animals**

Two relatives discovered in bats, mice, and zoo animals suggest “German measles” jumped the species barrier *By A. Gibbons*

**158** **NASA mission set to sample carbon-rich asteroid**

Bennu’s thick carbonate veins suggest past life as a water world *By P. Voosen*

### FEATURES

**159** **Sweden’s gamble**

The country’s pandemic policies came at a high price—and created painful rifts in its scientific community *By G. Vogel*

## INSIGHTS

### PERSPECTIVES

**164** **Novel communities are a risky business**

High turnover leads to novel combinations of species and involves high extinction *By M. Dornelas and J. S. Madin*  
REPORT p. 220

**166** **Making a bed for viral infections**

An inflamed mucosal niche is permissive for symptomatic respiratory syncytial virus infection *By A. S. Mirchandani and S. R. Walmsley*  
RESEARCH ARTICLE p. 188

**167** **Inhibiting Ebola virus and SARS-CoV-2 entry**

Screening identifies CD74 as a cellular antiviral protein against Ebola virus and SARS-CoV-2 *By A. I. Wells and C. B. Coyne*  
REPORT p. 241

**168** **A new villain in neuronal death**

A newly discovered partnership for glutamate triggers brain toxicity *By S. Jones*  
RESEARCH ARTICLE p. 191

**170** **Layer-cake 2D superconductivity**

An easy-to-synthesize quantum material may help unveil quantum effects *By L. M. Schoop*  
REPORT p. 231

**171** **Better, faster, and even cheap**

An inexpensive gold grid with submicrometer holes minimizes protein sample movement *By M. Rapp and B. Carragher*  
REPORT p. 223

**172** **Contextualizing bats as viral reservoirs**

Preventing zoonotic emergence from bats requires integrative research *By D. G. Streicker and A. T. Gilbert*

### POLICY FORUM

**174** **U.S. policy puts the safe development of space at risk**

Promoting national regulation of space mining rather than multilateral governance risks a “race to the bottom” *By A. Boley and M. Byers*

### BOOKS ET AL.

**177** **Plotting a path to a more sustainable future**

Persistent political pressure staves off global warming in a new climate allegory *By C. Abbott*

**178** **Moving beyond buzzwords**

Rejecting conventional connotations, two books urge readers to rethink innovation *By D. Greenbaum and M. Gerstein*

### LETTERS

**179** **Retraction**

*By Y. Wu et al.*

**179 Hidden ethical costs of conservation**

By K. E. Lynch and D. T. Blumstein

**180 Pragmatic animal welfare is independent of feelings**

By R. Arlinghaus et al.

**180 Animal welfare science aids conservation**

By J. O. Hampton et al.

**181 Response**

By N. Sekar and D. Shiller

**181 Technical comment abstracts****RESEARCH****IN BRIEF****182** From *Science* and other journals**REVIEW****185 Biotechnology**

Bioengineered human blood vessels

L. E. Niklason and J. H. Lawson

Recent advances in solid oxide cell technology for electrolysis A. Hauch et al.

REVIEW SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.ABA6118**RESEARCH ARTICLES****187 HIV**

Reconstitution and visualization of HIV-1 capsid-dependent replication and integration in vitro D. E. Christensen et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.ABC8420**188 Viral infections**

Neutrophilic inflammation in the respiratory mucosa predisposes to RSV infection M. S. Habibi et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.ABA9301  
PERSPECTIVE p. 166**189 Structural biology**

Conformational states dynamically populated by a kinase determine its function T. Xie et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.ABC2754**190 Metallurgy**

The heterogeneity of persistent slip band nucleation and evolution in metals at the micrometer scale S. Lavenstein et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.ABB2690**191 Neuroscience**

Coupling of NMDA receptors and TRPM4 guides discovery of unconventional neuroprotectants J. Yan et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT:  
DX.DOI.ORG/10.1126/SCIENCE.AAY3302  
PERSPECTIVE p. 168**192 Batteries**

Black phosphorus composites with engineered interfaces for high-rate high-capacity lithium storage H. Jin et al.

**198 Quantum gravity**

Spacetime from bits M. Van Raamsdonk

**203 Coronavirus**

In situ structural analysis of SARS-CoV-2 spike reveals flexibility mediated by three hinges B. Turoňová et al.

**208 Developmental biology**

The mole genome reveals regulatory rearrangements associated with adaptive intersexuality F. M. Real et al.

**REPORTS****214 Organic chemistry**

Electro-inductive effect: Electrodes as functional groups with tunable electronic properties J. Heo et al.

**220 Novel communities**

Increased extinction in the emergence of novel ecological communities J. M. Pandolfi et al.

PERSPECTIVE p. 164

**223 Electron microscopy**

Cryo-EM with sub-1 Å specimen movement K. Naydenova et al.

PERSPECTIVE p. 171

**227 Plant science**

WUSCHEL triggers innate antiviral immunity in plant stem cells H. Wu et al.

**231 Superconductivity**

Clean 2D superconductivity in a bulk van der Waals superlattice A. Devarakonda et al.

PERSPECTIVE p. 170

**237 Vaccines**

Influenza vaccine-induced human bone marrow plasma cells decline within a year after vaccination C. W. Davis et al.

**241 Coronavirus**

MHC class II transactivator CIITA induces cell resistance to Ebola virus and SARS-like coronaviruses A. Bruchez et al.

PERSPECTIVE p. 167

**247 Neuroscience**

Alternating sequences of future and past behavior encoded within hippocampal theta oscillations M. Wang et al.

**DEPARTMENTS****149 Editorial**

Here today, gone tomorrow

By Peter H. Raven and Scott E. Miller

**258 Working Life**

A pandemic journey By Sergio E. Ramos

**ON THE COVER**

The spike protein (teal), covered in protective glycan molecules, on the surface of SARS-CoV-2 is the primary target for COVID-19 vaccine development. The spike contains three hinges that enable it to be highly flexible on the viral surface and may facilitate host cell entry. The spike positions

shown here are from structural data of intact SARS-CoV-2 virions. See page 203. *Illustration: V. Altounian/Science; Data: Paul Ehrlich Institute, European Molecular Biology Laboratory, and Max Planck Institute of Biophysics*
