An Engineering Powerhouse

Top 10 for research expenditures. Twelfth for graduate programs among public institutions. And sixth among online master’s programs. Welcome to one of the leading engineering colleges in the United States.

From biomedical engineering to materials science to quantum computing, NC State is a growing hub of innovation — and one of the only universities to ever host two NSF Engineering Research Centers at once.

Join us at the forefront.

Where Science Gets Social.

AAAS.ORG/COMMUNITY

AAAS’ Member Community is a one-stop destination for scientists and STEM enthusiasts alike. It’s “Where Science Gets Social”: a community where facts matter, ideas are big and there’s always a reason to come hang out, share, discuss and explore.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
Apply for the new BII & Science Prize for Innovation today

Behind every life-changing solution is an entrepreneurial scientist—a creative mind who proved an idea in the lab and dared to carry it out in the world.

To encourage more scientists to translate their research, BioInnovation Institute (BII) & Science present a new annual award.

Our three winners will have their essays published in Science magazine and will be invited into BII’s entrepreneurial ecosystem. In addition, the Grand Prize winner will receive a prize of USD 25,000 and each runner-up will receive USD 10,000 at a grand award show celebration in Copenhagen, Denmark.

The call for applications has just opened. Apply before November 1, 2021.

Everyone Remembers Their First GRC!
October–November 2021

“I remember my first GRC experience because the talks and discussions provided a great learning opportunity for a young scientist. The free time and meals allowed for one-on-one meetings and the chance to form professional connections with peers and leaders in the field.”
